Thinking Breakthroughs

Success Stories:

Temenos T24 core banking transformation

As the technology partner for a leading bank in the Middle East, Nagarro supported the end-to-end Temenos T24 transformation which included finalizing requirements, implementation, testing, data migration, user training, and post-live support.

Loan origination system

Nagarro partnered with a leading CEE bank to develop a comprehensive loan origination system that improved the turnaround time and services for the customer, resulting in higher agility, transparency and efficiency.

Innovating for digital banking

The client was looking for a digital platform to enable lifestyle banking. Nagarro ideated on this and designed a product with mobile app-facilitated features like bill split and tag bill.

Mobile trading application

Nagarro developed an android & iOS-based solution for mobile trading app that helped the client with multiple business benefits such as real time monitoring of customer positions and period after market data.
