

A2A.Play✓Rite

Future-ready test automation built to scale

Accelerator

Reliable E2E automation doesn't happen by chance

A2A.Play✓Rite gives you a proven, scalable foundation to build reliable end-to-end automation – fast.

Whether you are

- **getting started** with test automation
- **migrating** your current automation framework to Playwright
- **struggling** with slow, fragile, or hard-to-maintain E2E tests

A2A.Play✓Rite is **built for exactly these challenges.**

What is A2A. Play✓Rite?

A2A.Play ✓ Rite is Nagarro's in-house web application test automation accelerator, built on Playwright with TypeScript. It goes far beyond Playwright's default setup and enables teams to focus on value — not on fixing their test framework.

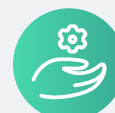

A clean, scalable architecture

Enforced best practices

Optional AI-enabled acceleration

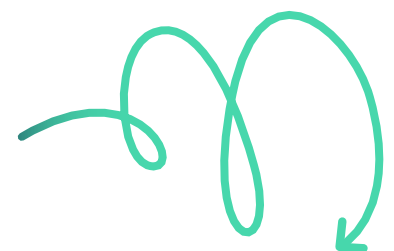

Support for functional and non-functional test automation

Why standard Playwright setups often fail at scale

Playwright is powerful, but intentionally lightweight. In larger projects, this often leads to:

- Increased technical debt after the first sprints
- Fragile tests and slow development
- Unclear architectural boundaries across growing test suites
- Sub-optimal utilization of Playwright's full potential

A2A.Play ✓ Rite addresses these issues **from day one.**

Key benefits

Faster time-to-value

- Setup reduced from weeks to hours
- Start developing tests immediately

Scalable, future-ready architecture

- Proven design patterns from 100+ projects
- Built to grow with your application landscape

Sustainable test automation

- Built-in code quality checks
- Enforced clean architecture and best practices

AI-ready by design (optional)

- AI-enabled foundation
- Up to 60% reduction in test script creation effort

All integrated into **one coherent framework**.

How we introduce A2A.Play ✓ Rite

A proven, structured approach

1

Discovery Workshop (1–2 days)

We understand your business context and define the top 3 priority use cases (S, M, L) to set the right foundation.

2

Proof of Value (2–4 weeks)

- Implementation using the A2A.Play ✓ Rite accelerator
- Automate test cases based on the selected use cases
- Optimized architecture tailored to your system landscape

Result: A scalable foundation, ready for expansion.

3

Expand & Scale

- Automation of additional high-value test cases
- Enablement of your test automation roles
- Continuous test automation integrated into feature development

Curious how
A2A.Play ✓ Rite
would work in your
environment?
