nagarro

Expand your capabilities and scale your digital initiatives with cloud technology

Platform as a Service (PaaS), Infrastructure as a Service (IaaS), and Software as a Service (SaaS) offer huge potential for airlines to ease their operations and boost their digitalization journey. We use our deep expertise to help airlines maximize the benefits of these technologies and help them cut costs, innovate rapidly, and expand effectively.

To find out how you can accelerate your transformation by leveraging cloud technologies, connect with our experts at **explore.tnl@nagarro.com**.

Thinking Breakthroughs

Explore untapped potential to reduce costs, innovate, and scale efficiently using cloud

Cloud based innovation

Digital transformation	▶	Internet of things	▶	Data intelligence & insights	▶	Mobile enabled social integrated business

Challenges

- Load burst traffic explosion
- High infrastructure costs
- Geo-distributed business
- Handling on petabytes of data
- Multi-vendor coordination
- Mission critical applications
- Long release cycles

Solutions

- Reduced carbon footprint
- Cap-ex free
- Global footprint
- Data driven decision enablement
- Dynamic scaling and provisioning
- Business continuity
- Faster time to market

How we can help

Cloud advisory workshops

Assessments and feasibility analysis

Cloud design and infrastructure

Business continuity and disaster recovery

Cloud transformation and cloud operations

Cloud compliance and governance

Our cloud enablement framework

Key targets

- Smooth transition from on premise to cloud
- Near-zero downtime for business-critical applications
- Governed and managed footprint on cloud
- Optimized for cost and fast ROI

Key objectives

- Security & compliance
- Business continuity
- Multi-regional deployments
- Disaster
- Recovery
- Scaling
- Performance

Cloud transformation methodology

- Retaining
- Retiring
- Rehosting
- Repurchasing
- Replatforming
- Refactoring

Nagarro cloud maturity model

- Existing cloud capabilities mapping
- Defining right targets in line with the vision
- Identifying cloud usability preferences & targets

Nagarro p5n migration approach

- Infrastructure experts
- Virtualization experts
- Cloud experts
- Software/application experts

Key skills

- Customized approach
- Migration checklists/ technology pathways/ application templates, and approach validation
- Partner consulting for Cloud Service Providers Partnerships (CSP)
