API-enabled business transformation

for financial services

Thinking Breakthroughs

We help drive revenue and cost efficiency while improving risk mitigation, agility, and time-to-market.
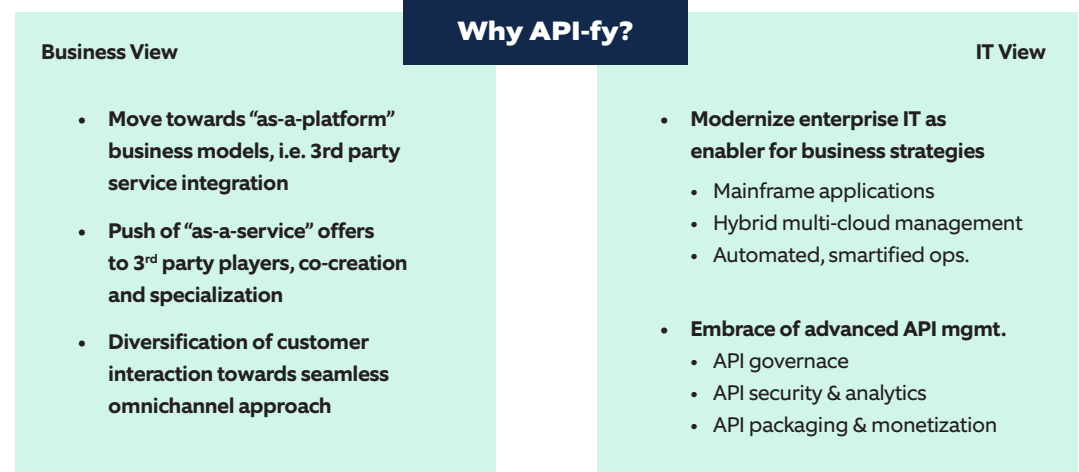

Business Challenge

Ever-growing customer expectations, the rise of platform businesses, and new concepts for modern enterprise IT are fueling the need for digital transformation and innovation within the banking and insurance fields. Both these spaces' transformational change has struggled due to shortcomings of tightly coupled legacy systems, lack of willingness to change and ever more stringent regulations. And yet, the pressure of disruption from newly emerged fintech startups has never been stronger.

In the face of this reality, what can banks, insurance companies, and financial service providers do? How can these players become more innovative, move faster, and increase cost efficiency while ensuring security and scalability?

In the digital era, we believe that advanced API strategy and management are instrumental to successfully drive digital transformation and innovation in financial services.

Why should you care about API's

Why API-fy?

Business View

- **Move towards "as-a-platform" business models, i.e. 3rd party service integration**

- **Push of "as-a-service" offers to 3rd party players, co-creation and specialization**

- **Diversification of customer interaction towards seamless omnichannel approach**

IT View

- **Modernize enterprise IT as enabler for business strategies**
  - Mainframe applications
  - Hybrid multi-cloud management
  - Automated, smartified ops.

- **Embrace of advanced API mgmt.**
  - API governace
  - API security & analytics
  - API packaging & monetization

For more about us, visit **www.nagarro.com**

What we do:

- Set the stage with an API strategy maturity assessment

- Develop API strategy incl. governance, business case

- Provide unbiased advisory on API mangement platform selection

- Design and implement API management solutions (e.g. developer portal, API marketplace)

- Run, optimize and further scale API-enabled business operations

Why Nagarro?

- SIT partner that is big enough to matter, small enough to care

- A strong delivery and "CARING" mindset

- Track record of more than 10 years of experience in API management projects

- Extensive API best practice know-how and vast API mgmt platform expertise

- Strong partnerships with leading API managment platform providers (Google Apigee, Azure API, WSO2 and more)

- Adjacent capabilities to holistically support transformation (e.g. enterprise architecture management, mainframe migration, cloud, SAP, DevOps, business agility & AMS)
