

Nagarro LifeSciences Package for SAP Cloud ALM

CSV with SAP Activate

agarro's way to integrate SAP Activate and CSV

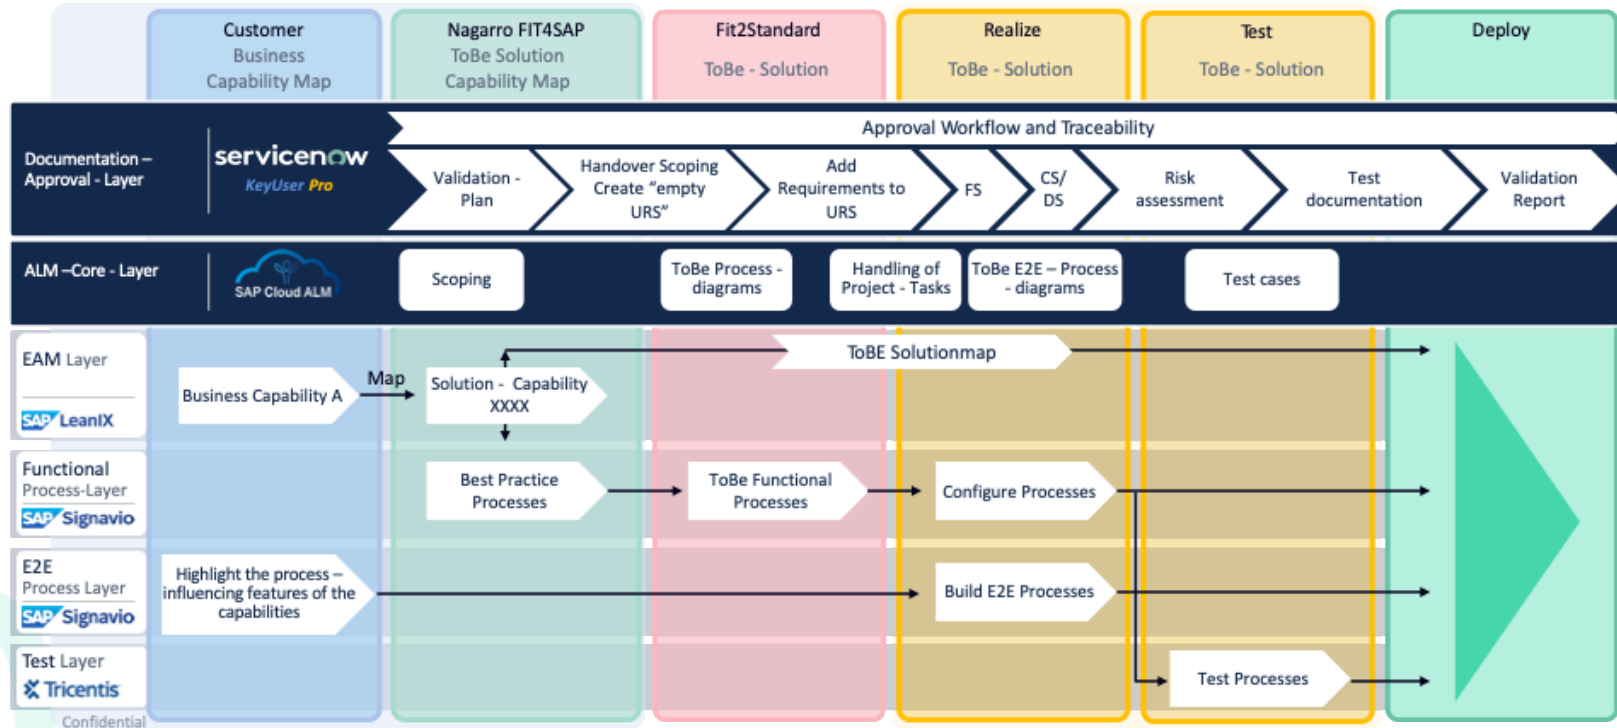

Challenges with CSV in SAP-Activate projects

- Computer System Validation (CSV) is challenging in combination with the agile SAP Activate methodology, as its iterative nature often complicates strict regulatory requirements for documentation and verification.
- Adjustments in the Explore and Realize phases require continuous updating of validation documents. Close coordination between project management, quality assurance and compliance is necessary to combine flexibility and regulatory requirements.
- The presented approach provides the appropriate supporting framework.

End2End-Project-Accelerator for the Regulated Industry

Nagarro LifeScience Package for SAP Cloud ALM

Why Nagarros LifeScience- Package for SAP Cloud ALM

SAP Cloud ALM focusses on basic functionality but will rely on integration with other cloud products:

Our Solution with ServiceNow

- Documentation for the regulated Industry
- Workflow/Approval for ALM
- Automation
- Support

Optional

- Signavio – Process Management
- LeanIX – Enterprise Architecture
- Tricentis – Test Automation

Value Delivered

Support of the
CSV-Process with
SAP Cloud ALM

Complete Record-
based CSV-
Process

Using SAP-
Transformation
Suite
