What do you appreciate most about Nagarro?

Nagarro is a land of entrepreneurs enabling people like me to unleash my potential daily. Secondly, the art of giving back to society is the big change I have inculcated in my personality. Thanks to Nagarro's CARING Culture.

What is that one quality that has helped you along your career path?

With the well-defined system around me, my problem-solving skills have always helped me execute result-driven outcomes. I want to change my title to a problem-solver.

What advice would you give the next generation of female leaders?

My dear ladies, stop feeling guilty or heartbroken for missing anything at home, especially when you push yourselves that extra mile at work. We really need to let go of perfection. Secondly, there is so much more than appearance. Focus on your passion and believe in yourselves.

Who is your personal role model?

My both sons! Seeing them makes me realize, “ Life is very easy as one can live without any judgement by simply trusting facts and practicing equality.”

Tell us about that 1 instance from your memory where you felt Nagarro had your back.

It was my first day in office, and I was offered to be the face of Nagarro for India's iconic brand in automobiles and present Nagarro. This was the WOW moment, and there are so many such instances where Nagarro gets unstoppable.
