nagarro

Q3 edition, October 2026

Hi from Nagarro

The last quarter marked a clear shift in the industry, with the focus on AI moving from experimentation to outcomes. Over the past few months, we have seen our AI focus increasingly translate into tangible outcomes across client work, partnerships, platforms, and industry recognition. Between signing an agreement with Persistent Systems, forging new strategic partnerships, and receiving recognition from ISG, DTW Ignite, and ETHRWorld, this has been an eventful period for Nagarro. The common thread: every move, from platforms to people, has been focused on scaling AI impact for clients.

So, sit back and grab your favorite cuppa, and join us as we look back at some of our recent highlights. Come along!

Thoughts from Manas

Hi from a Nagarrian

Dear reader,

This quarter, our work spoke for itself: in the outcomes our clients achieved, the partnerships we built, and an important step in Nagarro's journey.

Alongside the success stories featured in these pages, we forged some strong partnerships. Our collaboration with Cursor sharpens how we write software, while our partnership with Addverb extends intelligence into physical operations.

We also signed a Business Combination Agreement with Persistent Systems to form the Persistent-Nagarro Group, subject to regulatory approval. Together, we aim to create a global leader in AI-led digital engineering. Please support us on this new journey by giving us more opportunities to drive your transformation agenda!

Positive transformation happens when we move from friction to flow. The stories in this edition reflect that journey through the clients, teams, and ideas that moved forward this quarter.

Happy reading!

Manas Human

Co-founder, Nagarro

"From friction to flow."

A new chapter

A new chapter for Nagarro and Persistent

Nagarro and Persistent Systems signed a Business Combination Agreement to form a ~USD 2.9 billion AI-led engineering group with 46,000+ employees across 40+ countries, with Nagarro's boards recommending the offer to shareholders. Subject to regulatory approval, the combined group will bring together complementary strengths across AI, digital engineering, ERP, and CX, with greater scale and reach across key global markets.

Three new partnerships

01

Addverb

A new partnership for smarter robotic automation

Nagarro and Addverb signed a strategic MoU on advanced robotic automation solutions and digital twins for customers. This partnership spans joint solution development, IP co-creation, and shared robotic experience centers.

go.nagarro.com/addverb-tech →

02

Cursor

Nagarro named a Cursor Transformation Partner

Nagarro is now one of six global Transformation Partners selected by Cursor to help enterprises bring AI into software engineering at scale. Cursor brings AI-native development while Nagarro brings the engineering depth, governance, and operating expertise to integrate it into real development environments.

go.nagarro.com/cursor-pr →

03

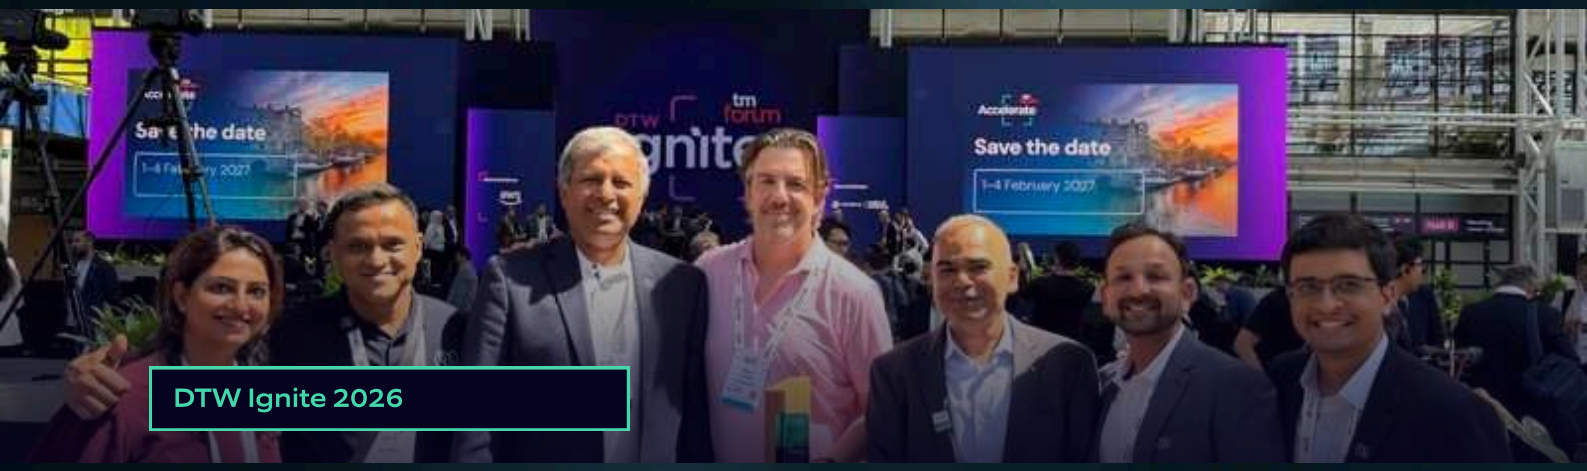

DigitalAPI

A governance layer for AI agents

Nagarro has partnered with DigitalAPI to help enterprises securely govern, manage, and scale the APIs and AI agents that increasingly power their operations. This partnership will help organizations bring governance, security, and observability to both traditional APIs and emerging AI-agent interactions.

Nagarro on the global stage

DTW Ignite 2026

Nagarro wins big at telecom's global stage

Built with industry partners, Nagarro's Agentic NOC Catalyst won the TM Forum Open Innovation Catalyst Award at DTW Ignite 2026. The award recognizes Nagarro's contribution to advancing innovation in the telecom industry.

Nagarro tops ISG's Global CX rankings

93.05

overall CX score — industry average 86.59

Nagarro won the global ISG CX Star Performer for 2026 Award among mid-size digital engineering service providers, with the highest customer satisfaction scores (an overall CX score of 93.05 versus 86.59 as the industry average).

go.nagarro.com/star-performer →

Nagarro wins gold at ETHRWorld Future Skills Awards

Nagarro won gold in the Best Neurodiversity Learning Program category at the ETHRWorld Future Skills Awards 2026. This achievement reaffirms our belief that learning must be inclusive.

Marubeni

How Marubeni enabled 10x faster decisions for clean energy trading

10x

faster decisions

Marubeni worked with Nagarro on an AI-powered solution to evaluate renewable energy trading opportunities using real CAISO market and operational data. The solution delivered 80–85% Percentage of Perfect Foresight (PoP) revenue, improved PoP revenue by 10%, and enabled 10x faster decisions.

go.nagarro.com/ai-marubeni →

80% faster regression testing, zero guesswork

80%

less regression time

By shifting critical validations from UI-heavy automation to an API-first QA foundation, Nagarro helped a global management consulting leader cut regression testing time by 80%. This also improved stability and release confidence.

go.nagarro.com/faster-regression →

REPAY

REPAY reimagines payments beyond the transaction

REPAY partnered with Nagarro to modernize its payment platform for greater scalability, efficiency, and customer-centric innovation. Both teams worked together to solve real business challenges and drive measurable impact.

go.nagarro.com/repay-ss →

Oldcastle APG

Oldcastle APG creates a smoother digital buying experience

Oldcastle APG partnered with Nagarro and BigCommerce to enhance the buying experience for its residential customers while lowering cost-to-serve. The collaboration built stronger digital capabilities and smoother commerce experiences.

go.nagarro.com/oldcastle-ss →

Fullbay

How Fullbay made test automation 45% faster

As **Fullbay** scaled its product ecosystem, it introduced Amazon Q into its test automation workflow with support from Nagarro. The implementation improved automation speed by up to 45% across more than 1,300 automated test cases, helping reduce manual effort while enabling faster and more scalable test development.

go.nagarro.com/fullbay-ss →

Rosenberger

Building an AI-ready testing foundation at Rosenberger

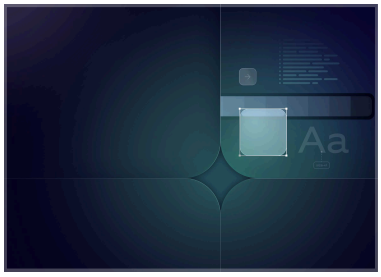

Rosenberger Telematics partnered with Nagarro to build a Playwright-based test automation framework integrated into its CI/CD pipeline. Designed to support AI-assisted test development, the approach can reduce the effort required to create automated test scripts by up to 70% while enabling faster feedback on software changes.

Thought leadership

01 — Design

Most design systems weren’t built for AI

Can AI actually understand your design system or is it just guessing? Without structured context, even the smartest AI tools default to assumptions that quietly undermine product quality.

go.nagarro.com/ai-ready →

02 — Aviation

Airlines are sitting on an untapped AI edge

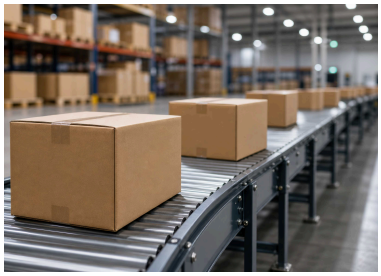

Most airlines already have strong AI capabilities in isolated pockets. This piece explores how carriers that get intelligence flowing across the business, rather than staying siloed, are positioning themselves for the next competitive edge.

go.nagarro.com/intelligent-networks →

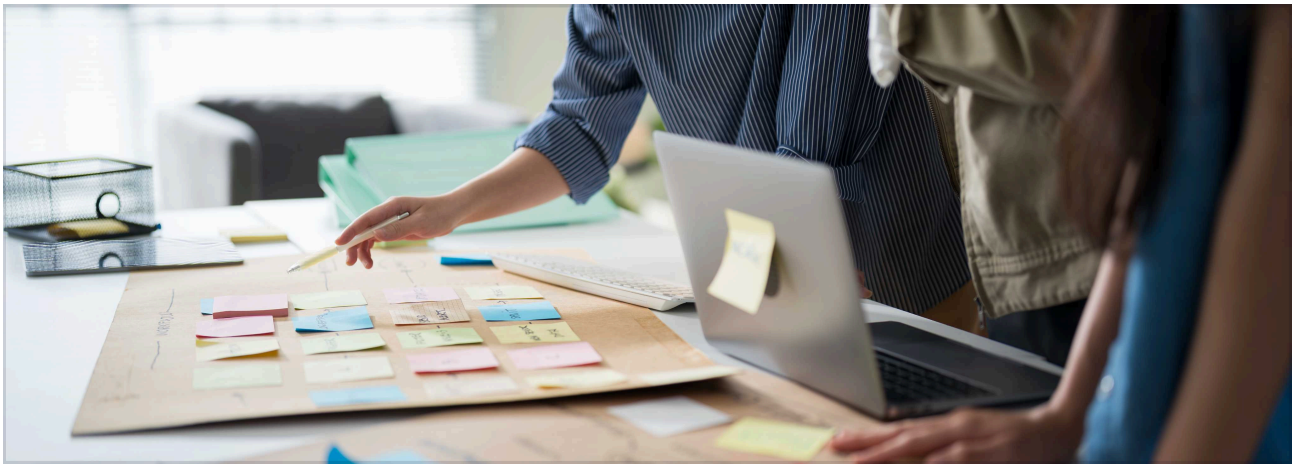

03 — Commerce

Your order system is living in the past

Most order management systems are still not in tune with today’s requirements. This article explains how Distributed Order Management brings real-time visibility and smarter routing that turns inefficiency from a cost problem into a strategic one.

From the C-suite

Why being AI-first means redesigning everything

In this C-suite blog, Eugen Rosenfeld argues that enterprises are ready to embrace AI, but the real opportunity lies in redesigning how the business works around it, not bolting AI onto old workflows.

go.nagarro.com/ai-first →

From the C-suite

The factory is becoming the product

Organizations that create durable advantage increasingly invest in improving the systems that produce value, not just the products themselves. This article explores how AI, digital twins, agentic systems, and meta-engineering principles are helping enterprises evolve toward continuously learning and self-improving operating models.

go.nagarro.com/self-opt →

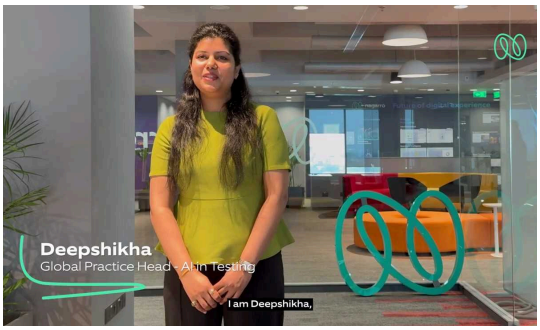

From the C-suite

What if the risk was always there?

Frontier AI is changing how vulnerabilities are discovered, exposing risks that may have existed long before they were identified. This article examines the difference between vulnerability and attack susceptibility, and why organizations may need to rethink cybersecurity risk through more predictive and continuously updated approaches.

Nagarro Nuggets

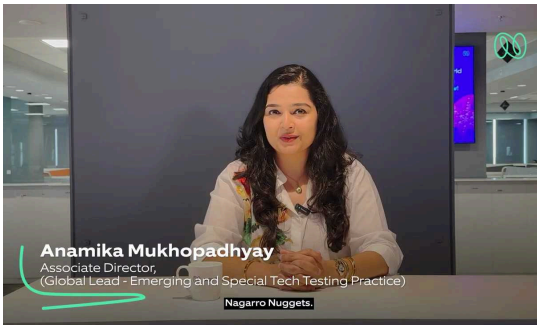

Testing AI agents means testing how they think

In this episode of Nagarro Nuggets, AI testing expert Deepshikha explains why testing autonomous AI agents can't stop at checking the final output. As agents choose tools, trigger workflows, and act independently, the entire decision journey needs to be tested.

go.nagarro.com/nuggets-25 →

Nagarro Nuggets

How Agentic AI can support performance engineering

Discover how Agentic AI can support performance engineering across the lifecycle, from script generation and maintenance to production-based workload modeling, log analysis, and faster root-cause identification. Use AI to reduce repetitive engineering work while helping teams analyze production behavior and identify issues earlier.

go.nagarro.com/perf-engg →

Great reads within 5 minutes

01 — Digital trust

Can you still trust what you see online?

Discover how deepfakes actually work, where they're being deployed, and why the line between real and fabricated content is blurring faster than most organizations realize. Digital trust is becoming a business-critical concern, not just a technical one.

go.nagarro.com/deepfakes-risks →

02 — Banking

Banks don't need a big-bang AI overhaul

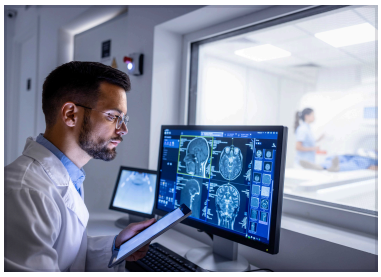

Financial institutions can skip risky, all-or-nothing transformation programs by modernizing around their legacy cores instead. An orchestration-first approach unlocks faster customer journeys and AI readiness without requiring high-stakes migration.

go.nagarro.com/legacy-systems →

03 — Healthcare

What if every doctor saw the full picture?

Explore how unified patient data integration is reshaping healthcare interoperability, breaking down the data silos that quietly limit clinical decision-making. Better-connected data, combined with the right clinical context, can help improve patient outcomes.

go.nagarro.com/unified-pdi →

Section 04

Recent launches 04

Forcastra

A platform that cuts planning effort by 70%

Forcastra, Nagarro's AI-native demand planning platform, helped a leading global food and beverage company cut manual planning effort by 70% while significantly improving forecast accuracy.

go.nagarro.com/forcastra-nagarro →

70%

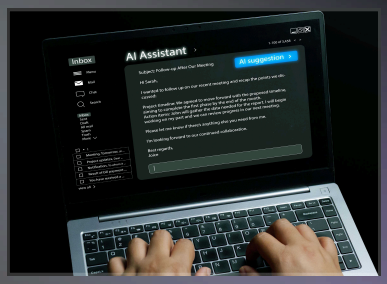

less planning effort

ATLAS

A faster path to multi-cloud transformation

Nagarro's ATLAS platform accelerates multi-cloud transformation through agentic AI, helping enterprises assess, migrate, validate, and modernize cloud environments while improving cost visibility and operational control.

go.nagarro.com/atlas-platform →

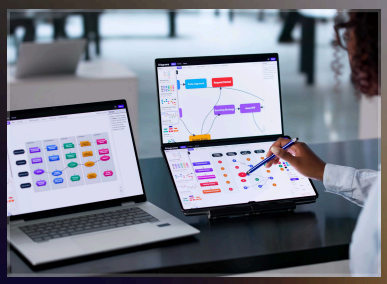

Qatalyst

Business context for AI coding agents

As Nagarro's AI-powered quality engineering accelerator, Qatalyst enhances AI coding agents with enterprise intelligence, project-specific context, and intelligent automation. It brings test engineering, execution, optimization, and reporting into a unified quality engineering workflow.

go.nagarro.com/qatalyst-ai →

Community

Building greener communities, one city at a time

Nagarro is helping develop a new Material Recovery Facility in Gurugram as part of a public-private initiative to improve scientific waste processing and recycling. With capacity to process around 42 tonnes of waste every day, the facility aims to reduce pressure on the Bandhwari landfill while strengthening waste management for nearby communities.

People & recognition

01 — Girls' Day

Introducing the next generation to a career in tech

Nagarro's Girls' Day across Kronberg, Freiburg, Pirmasens, and Leverkusen was fully booked again, giving young participants hands-on programming experience alongside Nagarro's apprentices and dual students.

go.nagarro.com/girls-day →

02 — Romania

Romania recognizes Nagarro's culture and commitment

Nagarro was named a Lovable Workplace by DreamJobs Romania, standing out among 200-plus nominated companies as one of just 11 winners, also bagging a bronze award at the Romanian Sustainability & CSR Awards 2026.

go.nagarro.com/workplace-award →

03 — Germany

Nagarro on LinkedIn's Germany list

LinkedIn listed Nagarro at #9 on its Top 25 Companies in Germany for 2026, a ranking built entirely on platform data measuring skills growth, career progression, and hiring demand rather than a survey or vote.
