# Industry and Automation

Enabling Connected Enterprise

CONNECTED ENTERPRISE

Enterprises are accelerating digitalization initiatives and adoption of Industry 4.0 goals, rapidly transforming themselves into a Connected Enterprise.

A Connected Enterprise creates an interconnected and interdependent network across different parts of an enterprise value chain, from product design to warehouse, manufacturing to logistics, and marketing to after-sales.
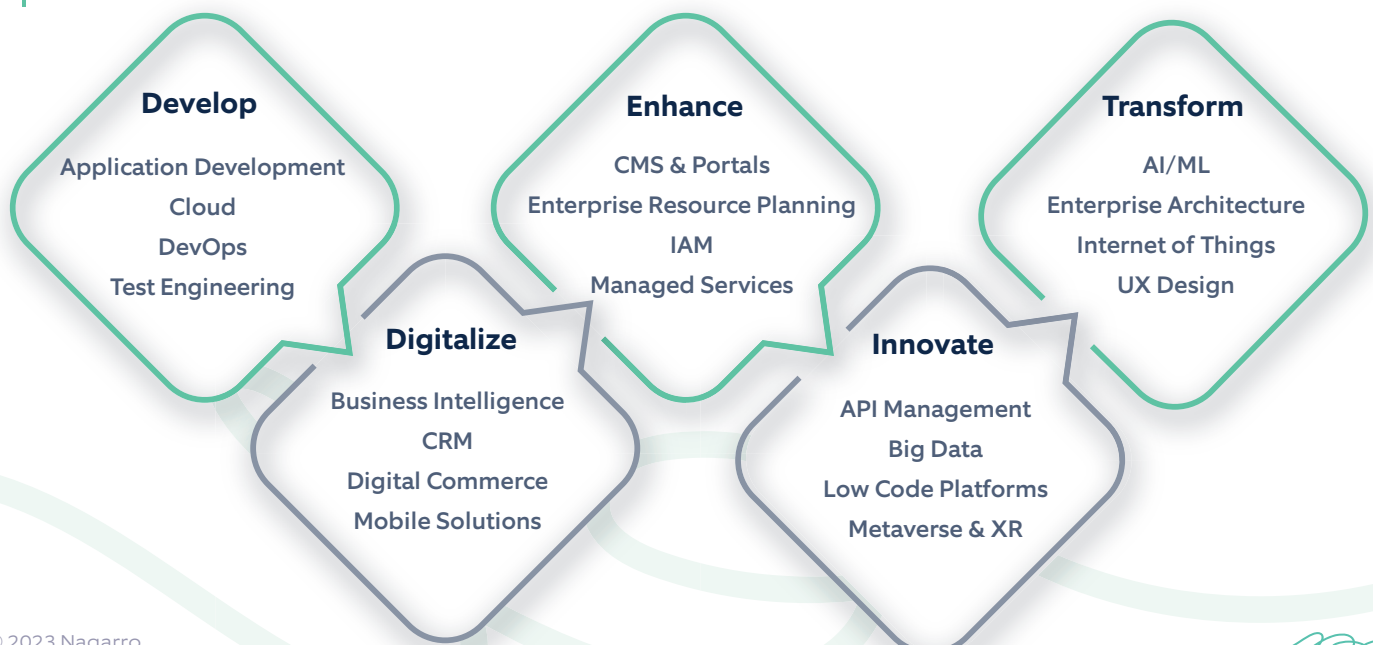

Nagarro is creating breakthroughs solutions for many industrial companies globally. We combine our technology expertise, drive for innovation, and CARING values to help solve your challenges and be a trusted partner in your digital transformation goals.

OUR FOCUS

We enable enterprises to become connected across their value chain. Our technology services enable you to accelerate product innovation, digitalize factory operations, enhance workforce productivity, create service differentiation, and improve customer engagement.

SUCCESS STORIES

Quality management for smarter factory

Designed an award-winning, cloud-based manufacturing intelligence platform for a global leader in statistical process control software. The platform collects information from various shopfloor sources and presents insights for quality management with role-based access, drill down analytics, multi-language support, and customizable visualization.

Technology enablers

Cloud	Data analytics	IIoT	User experience

Self-service business insights as a smarter service

Built a unified data platform for a global leader in industrial products. The platform unifies data from multiple enterprise sources by building a cloud-based data lake. It leverages Azure PaaS and IaaS to enable self-service business intelligence insights with role-based anytime-anywhere access.

Technology enablers

Cloud	ERP	BI	DevOps

Digitalizing field sales with connected worker

Digitalized sales process with customized mobile applications integrated with Salesforce and SAP, for field sales team and dealers of a global building materials company. This led to higher sales efficiency, better collaboration, and improved sales engagement.

Technology enablers

Mobile	ERP	CRM	User experience

Creating resilience in logistics with smarter services

Developed an asset tracking solution integrated with multiple enterprise software, for one of the global leaders in beverage manufacturing and distribution. This enabled real-time supply chain transparency, asset traceability, and inventory optimization.
