Featured success stories

One of the largest global manufacturers of architectural products

Nagarro set up a holistic digital transformation program with workstreams covering cloud migration, application modernization, change management, program governance, process automations and support services.

We successfully upgraded their ERP platform from Infor M3 v13.4 (on-prem) to M3 CloudSuite, while supporting the existing Infor M3 applications and carrying out enhancements & new customizations to support the business.

Leading Finnish pulp, paper, and energy company

Nagarro maintained business continuity by offering global application support for the on-premise Infor M3 v13.4 system, providing functional assistance and implementing enhancements supporting industry best practices.

This included process improvements through requirement studies, functional configurations, development support, solution testing, and user training. Additionally, Nagarro managed master data and user access via the Smart Data Tool and in-house applications.

Customer testimonial

“Nagarro team’s efforts and dedication during our collaboration on migrating all custom applications and databases from Infor’s on-premises (M3 13.3) to M3 CloudSuite infrastructure have been exceptional. It included the development of bespoke solutions and various test automation to cater to our business needs.

Despite facing stringent timelines, Nagarro demonstrated unwavering accountability. I look forward to continuing our successful partnership on future endeavours.”

- Avdhesh Paliwal,
Engineering Manager, Oldcastle APG
