

SAP Practice Lead - Production & Planning - Focus on Manufacturing Industries (f/m/n)

United States, Flexible office

Unleash your potential. If you have passion for technology, an eye for quality and believe in lifelong learning, Nagarro is the place to be. There's never been a better time to join our team. Drive end-to-end innovation. From strategy to implementation, help clients accelerate their journey to the "new". Be part of the New. Change the world with SAP.

For our global SAP practice, we seek Business and Systems Integration professionals who possess deep skills in analysis, design and implementation of solutions based on leading practices in Manufacturing and Supply Chain Planning and the most recent SAP S/4HANA technology.

Tasks

- Analysis, modelling and conception of processes for clients in Manufacturing Industry in the area of production & planning (PP, Supply chain, Integrated Planning)
- Design of discrete manufacturing-specific End-to-end scenarios with focus on Manufacturing and Supply chain capabilities
- Analyze SAP business best practices and make suggestions for improvements or new potential
- Deliver advisory services on how SAP technologies enable a modern and digital PP or SCM function
- Research key business issues to identify improvements across the value chain and support implementation of technology solutions for clients around SAP solutions
- Elaborate innovative potentials of the new S/4HANA solution, staying relevant and in sync with market changes and innovations
- Contribute to practice growth through innovative spirit
- Functional advisory and support of team members

Basic qualifications?

- Integrated module and process understanding in the area of discrete manufacturing
- In-depth knowledge in at least one SAP module (PP, PP/DS or IBP)
- Experience in full life cycle implementation of SAP projects
- Interest to promote new topics
- Solid written, verbal and interpersonal communication skills
- Intercultural understanding
- Ability and willingness to travel, depending on the project requirements

What we offer you?

- International teams, interesting customers
- Innovative project approach
- Latest Technologies and Platforms: Google Cloud Platform, S/4HANA, IoT, AI, SAP Leonardo...
- Wide possibilities of professional and personal development
- Participate Learning boards, webinars and training programs from our SAP partnership
- Flexibility – both working time and location; room for good work-life balance
- Our benefit and family program
