.Net Developer

Established in 1996, Nagarro began as a dream of a few friends who wanted to create a company with a difference – a company that focused on "strategic differentiation via technology" initiatives rather than routine IT operations. Today we are more than 5000 experts across more than 20 countries. Together we form the global services division of Munich-based Allgeier SE.

At Nagarro, you can look forward to a work culture that is dynamic and non-hierarchical. You will be given opportunities to add value to challenging and complex assignments, while collaborating with world class technologists. The versatile environment here, helps foster fresh perspectives and enables you to deliver high quality code. There will be ample opportunities provided for skill upgradation to accelerate your professional and personal development.

Key Responsibilities

› Analyzing the project's requirements and the ability to convert said requirements into technical documents, design and code
› Implementing design methodologies and tool sets
› Writing well-designed, defect free code which scales well and follows all best practices and guidelines
› Executing the development of software with a strong focus on the security, performance, and robustness
› Conducting deep level analysis to identify root cause to systematically resolve issues
› Following all defined software configuration management best practices
› Reviewing code to identify issues as well as deviations from best practices
› Addressing issues promptly, responding positively to setbacks and challenges with a mindset of continuous improvement

Must Have Skills

› Fundamental knowledge of dotnet technology (Full Framework 4.7.x),
› Experience with UI Frameworks for Client Applications WPF, Dependency Injection Unity/PRISM and Version control and processes (branching, merging) via git
› C# (7.0) with experience in writing code optimized for high performance, should be hands-on on multithreading and parallel programming.
› Good knowledge of Unit-Testing/Test-Driven development (xunit, mstest)
› Passionate about writing world class code
› High level of commitment to client satisfaction and agility
› Collaborate with others and build positive working relationships
› Possess a strong work ethic
› Strong written and verbal communication skills
› Willingness to travel depending on project requirements
