

Bringing modern data engineering to enterprises

Our offerings

Cloud Data Migration

Enable greater cost savings. Improve efficiency, quicken time to delivery, and pave the way to data-driven business models.

Modern Business Intelligence

Transform data into actionable insights. Sophisticated, easy-to-use interfaces let you prioritize self-serve analytics and empower users by extracting value from data, independently.

Data Warehouse/ Lakehouse Modernization

Move to cloud-based data warehouses & lakehouses to reduce infrastructure costs, bring scale and efficiency to data-driven initiatives, and gain competitive advantage.

Big Data Analytics

Elevate enterprise-level analytical capabilities. Leverage streaming and batch data analytics to gain new insights, execute smarter and more effective strategies.

Data Governance, Data Quality, and Master Data Management

Help AI learn new tasks with its existing knowledge and other limited data, just like human beings.

Competency areas:

Data engineering | Big data engineering | Enterprise data strategy | Data OPs and CI/CD
