# LOW CODE NO CODE - THE INDIA STORY

Revolutionizing Software Development

March 2022

# Foreword

Over the years, technological disruption has dramatically changed how organizations in various industries create value for customers, employees, and other stakeholders. But there is one change that is disrupting the way the technology industry itself functions – “Low Code No Code” (LCNC), which is reshaping the way a lot of software is being developed. The accelerated need for digital transformation in the post-pandemic era has further pushed LCNC into high gear. This need for going digital coupled with LCNC’s ability to deliver new capabilities with lower dependence on developers, makes it well positioned to witness significant growth amidst the current technology talent shortage wave that has become a global challenge.

NASSCOM, in collaboration with Nagarro, has launched this research study to assess the state of Low Code No Code in India. As part of the report, 60 LCNC providers and adopters have revealed very valuable insights, which can help others in deciding how to pursue this opportunity. With this report we have analyzed the nascent Indian Low Code No Code market, and how stakeholders together can make a big difference to realize the full market potential. We hope you find value in the insights from this study; do share you feedback at [research@nasscom.in](mailto:research@nasscom.in)

# Executive Summary (1/4)

## LOW CODE NO CODE – THE FUTURE OF APPLICATION DEVELOPMENT

# Executive Summary (2/4)

## Global LCNC Market

### The Maturing Global LCNC Market

**At \$13.8 Bn in 2021, Global Low-Code Development Industry is expected to grow at a CAGR of 28.1% from 2021-2025**

- Low-code application platforms (LCAP) account for majority of the market
- LCAP and RPA/Process Automation applications were the highest growing segments in 2021
- BFSI, Healthcare and Hi-tech sector are the leading adopters of LCNC
- Form/Data Collection, Workflow & Process Automation are the top Use Cases

### Major Advantages of LCNC

#### Technology Players

- Rapid Prototyping
- Faster Development
- Better focus on client needs

#### Industry Adopters

- 50%-75% - Reduced Time for Software Development Life Cycle
- Speed-to-market
- Flexibility

## Indian LCNC Market

### The Nascent Indian LCNC Market

**India's LCNC market crossed \$400 Mn in FY21 growing at a CAGR of 15% since FY19**

- 70% of revenues from global markets
- The market currently has ~150 LCNC players, with majority players being bootstrapped start-ups
- BFSI, Retail, SaaS are the leading adopters
- Indian IT companies partners with LCNC providers to accelerate digital transformation

### India Advantage

- Talent Pool
- IT Ecosystem
- Huge Indian Market for technology services
- Cost Advantage

# Executive Summary (3/4)

## Survey Insights

### Growing Opportunities for Indian LCNC Providers

Large enterprises have higher awareness and adoption compared to SMBs

Global markets continue to drive a larger share of revenues with 80% respondents reporting 150% - 200% growth in FY21 revenues from global customers

Retailers and manufacturers are the key emerging segments

### Key Benefits realized by Adopters

3X-7X reduction in Development & Deployment Time

3X-5X reduction in Cost of Development

1.2X-1.5X Increased Productivity

30%-35% increase in ROI

### Major Inhibitions

Reluctance from decision makers to move from established legacy to LCNC

Few Options for Customization Solutions for SMBs

Lack of training/fear around feasibility of implementation

# Executive Summary (4/4)

## Success Factors and Outlook

### Success Factors

Skills for new roles including product owner, pro-coder, subject matter expert, tester, application designer

An asset light model which is suitable for both cloud and on-premise

A balanced sales mix driven by both direct sales and partnership model

Key product differentiators – scale and ease of integration, cost effective and customizable solutions for wider community acceptance

### Outlook

Digital first enterprises will continue to drive adoption and growth of low code no code

India has the potential to generate \$4.0-\$4.2Bn revenues from LCNC by FY25 in an optimistic scenario, accounting for ~10% of the global market

## Recommendations

### LCNC Providers

Provide custom pricing models to adopters

Partner with mid size and SMB IT services firms

Build talent pool & focus on skilling

### LCNC Adopters

Strong leadership commitment through LCNC budgets and execution support

### Associations

Spread awareness on LCNC

Reskilling support

# LOW CODE NO CODE INDUSTRY OVERVIEW

# “Low Code No Code” – The Future of Application Development

## CUSTOM CODE

- Developers build the entire service or product from scratch
- The solution fits exactly and only with specific business need

### Conventional software development

requires writing lines of code to computer program. Programmers must have in-depth knowledge of computer languages, as well as development and deployment processes.

## WHAT IS LOW CODE?

- Ready to develop blocks of code which enables Minimal Hand Coding
- Developers add custom code on top of a readymade low code

### Low Code Application Development

supports Rapid Application Development, one- step development and deployment, by using declarative high level programming abstractions with minimum hand coding.

## HOW IS NO CODE DIFFERENT?

- Ready to use components which contain the actual code for different capabilities
- Developers directly link together these pre-built components

### No code Application Development

is a specialized extension of Low Code Development, typically used to allow non-technical users to build simple tactical apps by using visual tools like drag and drop.

# The Evolution of Software Development to Low Code Development

**FOR NEARLY 50 YEARS CODING HAS RULED, UNTIL LOW CODE GOT ESTABLISHED**

1970  
1990

## Fourth-Generation Programming Language (4GL)

Low-code development platforms trace their roots back to Fourth-Generation Programming Language (4GL)

A concept that was developed from the 1970s through the 1990s, overlapping most of the development of 3GL

1990  
2010

## Model-Driven Architecture (MDA) & Emergence of Mobile Platforms

**Rapid Application Development (RAD)** – RAD gained momentum in 1992 with the concept of visually “assemble” desktop applications by using tools like Visual Basic, Delphi, and Oracle Forms

**Model-Driven Architecture (MDA)** – Launch of Model-Driven Architecture (MDA) in 2001 as a software design approach that provided a set of guidelines for structuring and expressing specifications as models

**Evolution of Mobile Platform** – Launch of iOS by Apple & in 2008- Launch of Android by Google

2010  
2022

## Digital Transformation at scale

**Low Code as Industry** – 2014 Research Firm ‘Forrester’ coined the term “Low-code” and 2016 Forrester estimated the total market for low-code development

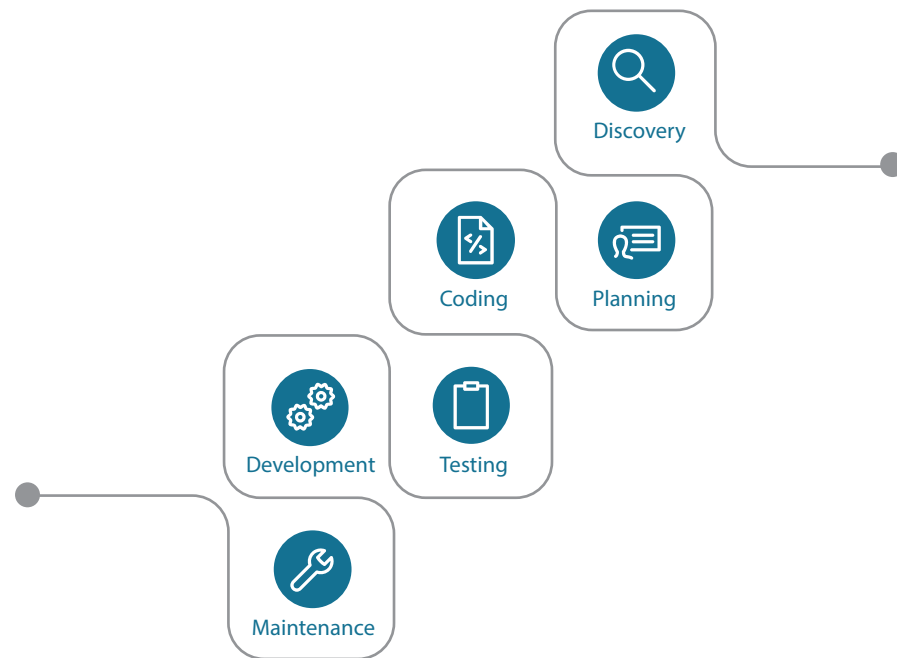

**Need for Digital Transformation at Scale** – COVID-19 pandemic pushed enterprises towards adoption of LCNC to fulfil agile development needs

# Shift in Software Development from Waterfall to Agile to Low Code No Code

## WATERFALL METHODOLOGY

Traditionally, the software development was done by the **Waterfall Model methodology** also known as Linear **Sequential Life Cycle Model**. In this, project development team only moves to next phase of development or testing if the previous step is completed successfully.

VS

## AGILE AND LOW CODE DEVELOPMENT

**In the Agile Model**, development and testing activities are concurrent, this helps in continuous iteration of development and testing in the software development process.

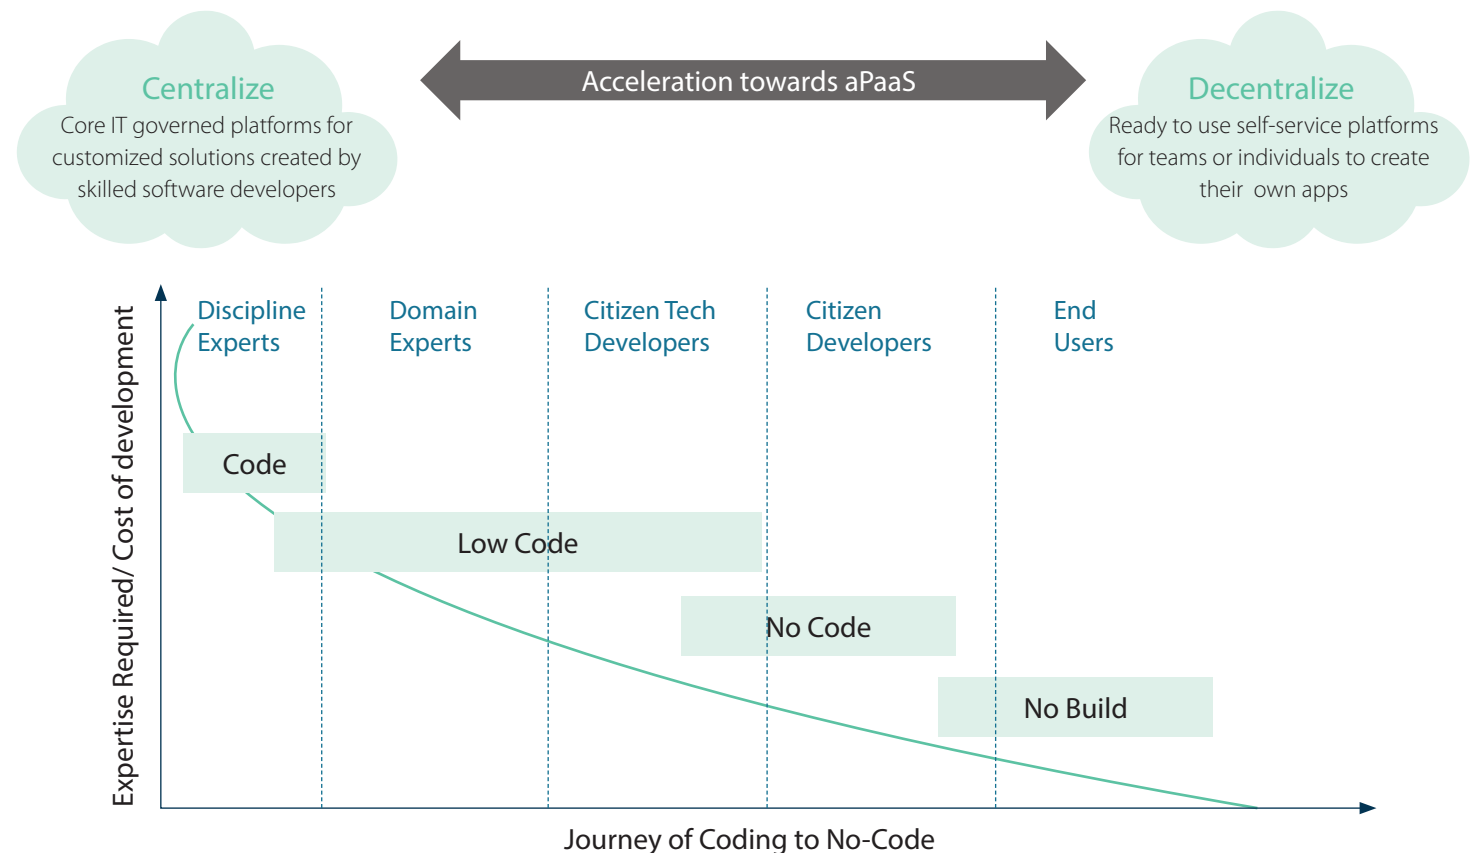

**Low Code Development is a specialized form of Agile**, replacing the need to write codes with visual drag-and-drop tools and process modelling, reusable components and real-time collaboration.

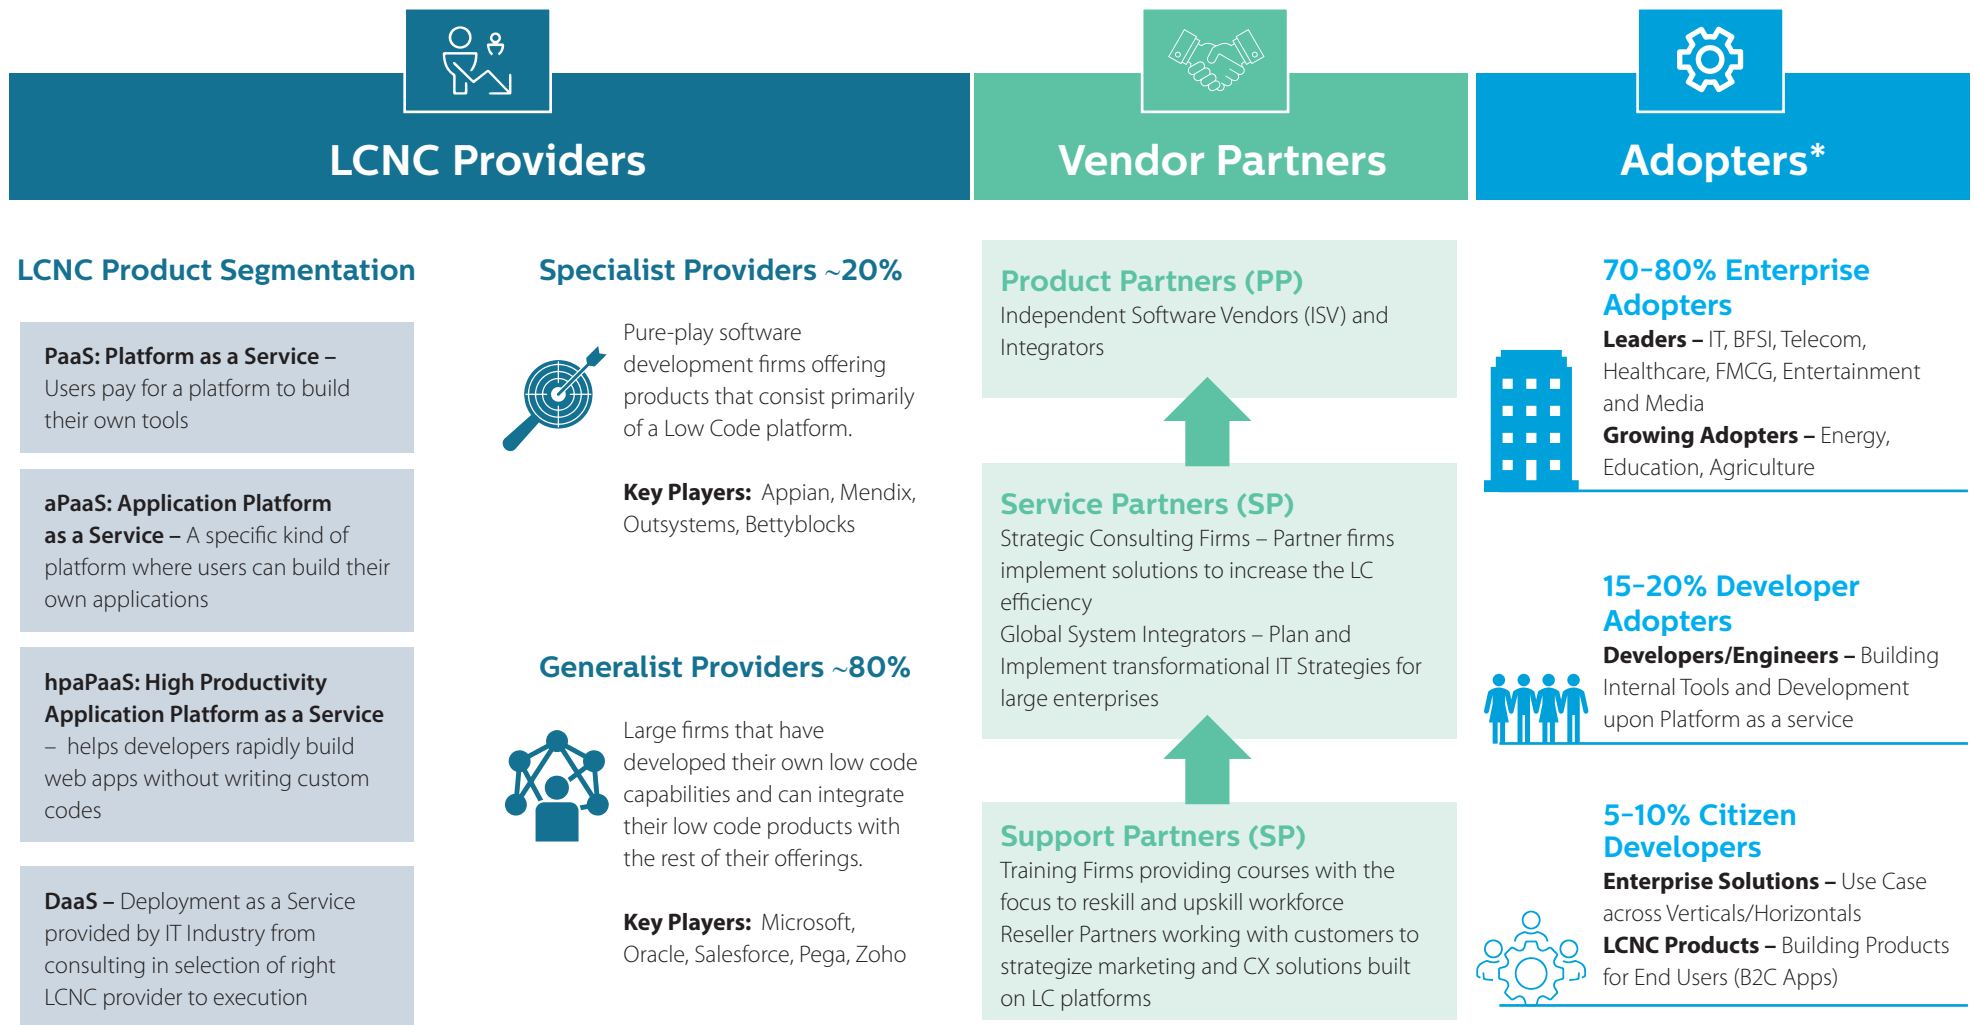

# Accelerated need for Digital Transformation and Cloud has shifted Low-Code into High Gear in turn supporting Democratization of Software

The accelerated need for digital transformation has pushed technology providers to democratize access to development tools with low code no code and application-platform as a service (aPaaS) playing a crucial role in this process. aPaaS is a cloud environment for designing, building, deploying and managing custom business applications. It is a great example of a centralized technology (the platform) that enables decentralized innovation (the applications), balancing the freedom to create with lightweight governance and guardrails.

## DEMOCRATIZATION OF SOFTWARE DEVELOPMENT WITH TIME

# The Low Code No Code Technology Landscape

# Need for Rapid Digital Transformation – The Key Driver

## DRIVERS OF LCNC TECHNOLOGY

## BENEFITS OF LCNC TECHNOLOGY

**Need for Rapid Digital Transformation**

**Reduces Time** to Development & Market

**Bridging the Talent Gap**

**Reduces Need** for Coding/Development Talent and Increases Collaboration with Business Users

**Integration Hurdles with Legacy Technology**

**Agility** to Deliver Apps across Platforms and Respond to Abrupt Market Changes

**Omnichannel Layer for End Users**

Enables **Consistency** in outcome through ubiquitous network access to users no matter device or cloud type

**Reusability**

Increases **Productivity** & Aides **Scalability** through Reuse and Automation of Operations Processes

# Case Study – Nagarro worked as a strategic partner with Austria’s hydraulic lifting manufacturer to automate inspection logging mechanism

## PROBLEM STATEMENT

**Brief:** One of Austria’s largest manufacturers of hydraulic lifting, loading and handling systems—with over 35% of the market share. As the world’s leading provider of innovative crane and lifting solutions, it accepts the present challenges and innovates solutions for the future.

**Challenges Faced:** The inspection in the manufacturing plant was carried out in a manual and error-prone manner using excel-based records. The mechanism caused delays in planning, coordination, and inspection logging of welded components at all factories across the globe.

## SOLUTION

Nagarro developed a Simplifier-based online platform to digitize the visual inspection process with the existing business logic and role-based access. The application, **developed within eight weeks**, allows shopfloor quality inspectors to inspect welded components, log defects, upload pictures and save inspection results along with the measurements & test results.

## IMPACT

The application digitized the visual inspection process for components and automated the inspection logging mechanism.

It provides the manufacturing plant, regional, and global view of the inspection results through dashboard graphs and charts, which provides insights into the data and can improve the yield of the welding process.

The application is available in 10 different languages,

Accessible in offline mode and

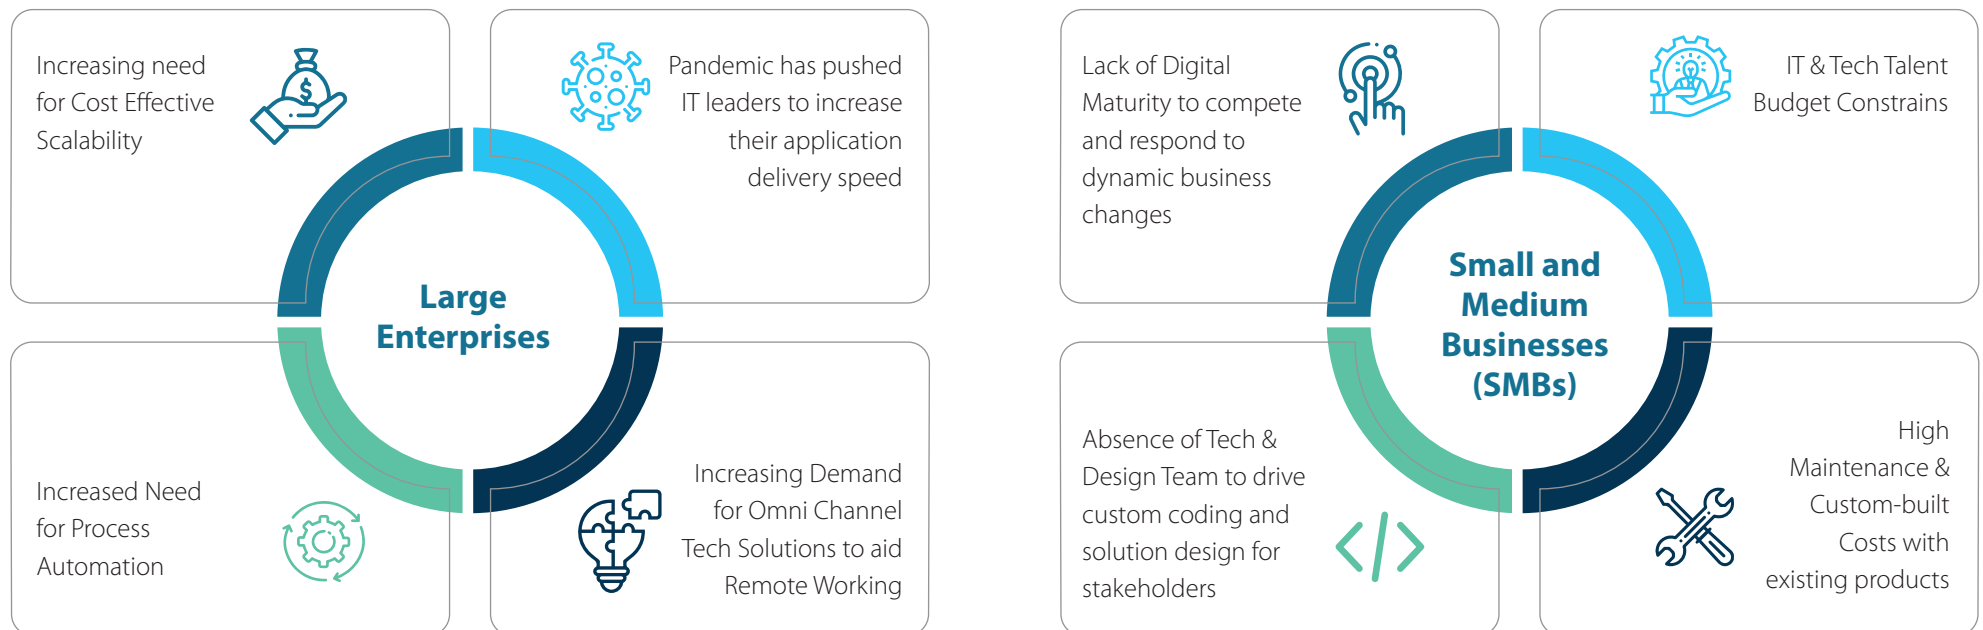

**Available to the shopfloor team on all devices such as mobile, tablets, etc.**

# LCNC Adoption primarily driven by Increased Need for Digitization

**Large Enterprise Adoption** – Driven by accelerated need for digital transformation specially post the pandemic. For example - Microsoft has witnessed a significant increase in their LCNC platform Power Apps subscriptions with over 80% of the Fortune 500 companies now using it.

**SMB Adoption** – Is largely driven by open source and low cost LCNC digitization apps. Players like Google support SMBs with various LCNC tools like App Maker, AppSheet, Apps Script, Google Forms, and App Engine

## KEY DRIVERS FOR LCNC ADOPTION

# GLOBAL PERSPECTIVE ON LCNC

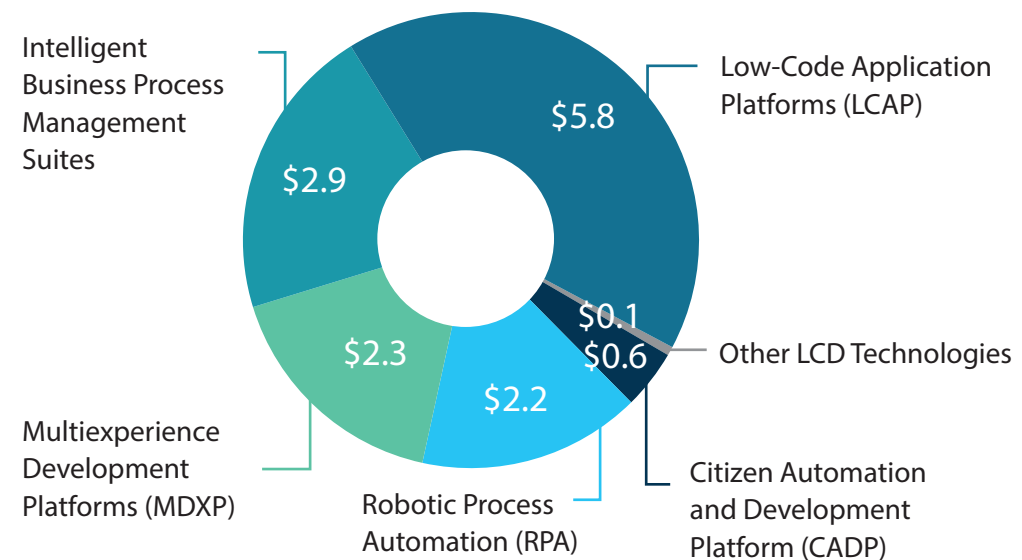

# \$13.8 Bn Global Low-Code Development Industry Expected to Grow at a CAGR of 28.1% from 2021-2025

## Global Low Code Market Size (Bn)

## Market Size By Type of Low Code Tech in \$ Bn (2021)

LCAP and RPA/Process Automation were the top growth segments growing at 37.3% and 30%, respectively in 2021

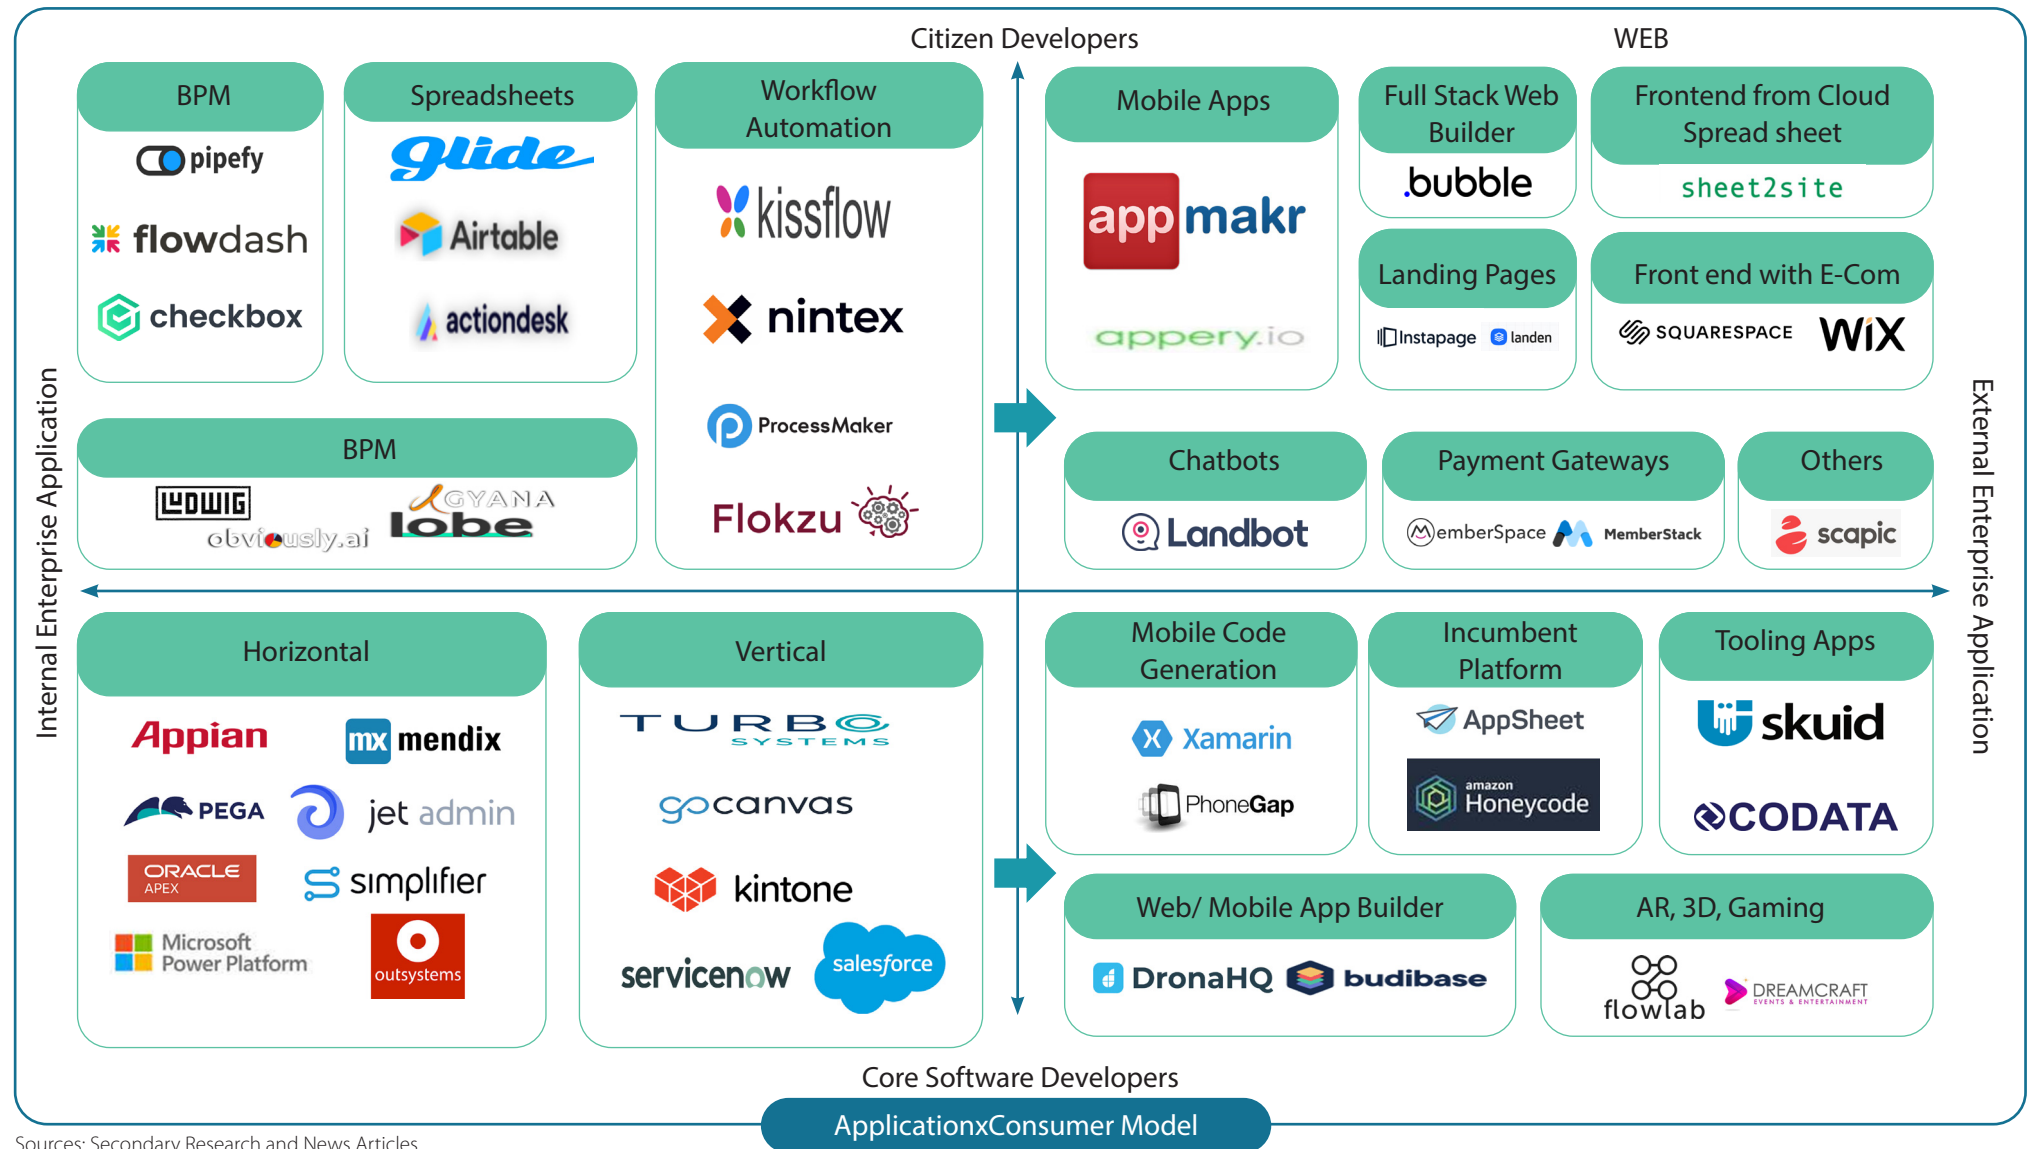

**SaaS and Hyperautomation Will Drive Low-Code Adoption** – Major SaaS vendors currently provide capabilities that incorporate low-code development technologies, and as SaaS popularity grows low-code market will see commensurate growth in LCAPs and process automation tooling.

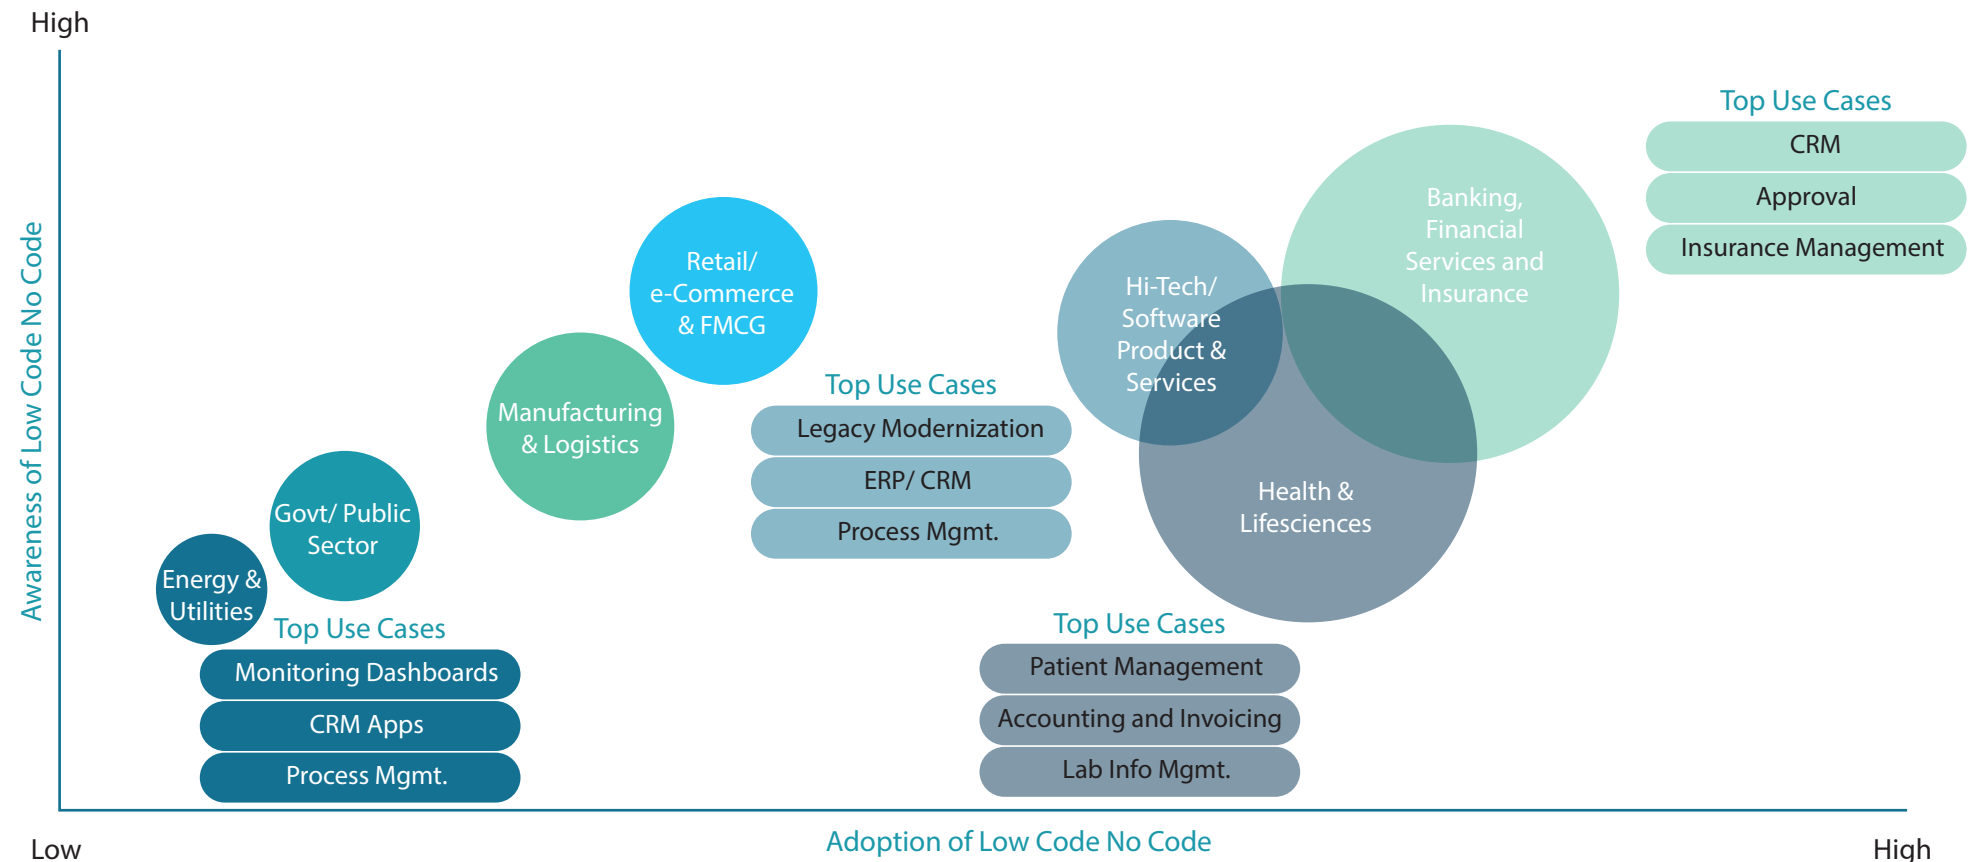

# The Global Provider Landscape – by Market Sub-Segments

Illustrative

# BFSI, Healthcare & Hi-Tech are leading Adopters, with manufacturing being an emerging adopter driven by industry automation

Size of Bubble indicates % Adoption

# Form/Data Collection, Workflow & Process Automation are Top Use Cases

# Case Study – Nagarro helped in driving higher shopfloor efficiencies and effective collaboration for one of the largest pharmaceutical importers in Germany

## PROBLEM STATEMENT

**Brief:** One of the largest pharmaceutical importers in Germany, with revenue of over USD 300 Mn was looking for a new age platform that provided end-to-end solution for tracking shopfloor tasks, reporting, and movement of boxes through cold storage.

**Challenges Faced:** Continuous reduction in operational efficiency, increasing manual errors in the existing process of recording data manually in paper-based forms for tracking shopfloor tasks and movement of boxes through cold storage.

## SOLUTION

Nagarro helped build a modern agile and scalable solution that needed a minimal learning curve and IT dependency. Leveraging Simplifier as the go-to-choice of Low Code platform, Nagarro built a role-based application. The platform allowed members on the shop floor to select the production orders, track the completion of tasks, and record the timings for removal and storage of production orders and batches in cooling stations. It provides the report for each production order with the details for all the phases.

## IMPACT

The new-age platform that enabled a one-click solution for the client

Helped improve the overall efficiency in tracking production orders, enhance accurate tracking, and boost collaboration in the day-to-day operations.

The app also enables visualization of complete reports of logged hours, overtime, and more displayed automatically.

# Rapid Prototyping and Faster Development are the major advantages for Tech Players from LCNC

## Rapid Prototyping

1/3rd Time to Prototyping for Clients compared to traditional software development methods

>50% faster prototype to full-fledged solutions

## Faster Development

Faster Time to Market – 50%-75% Faster Launch with Pre-coded solutions and customizations on the go

## Better Focus on Client Features/ Needs

Functional Mindset – Domain/ Business Stakeholders innovate and develop client driven solutions through standardized, pretested, and ready-made components

## Fewer Integration Challenges

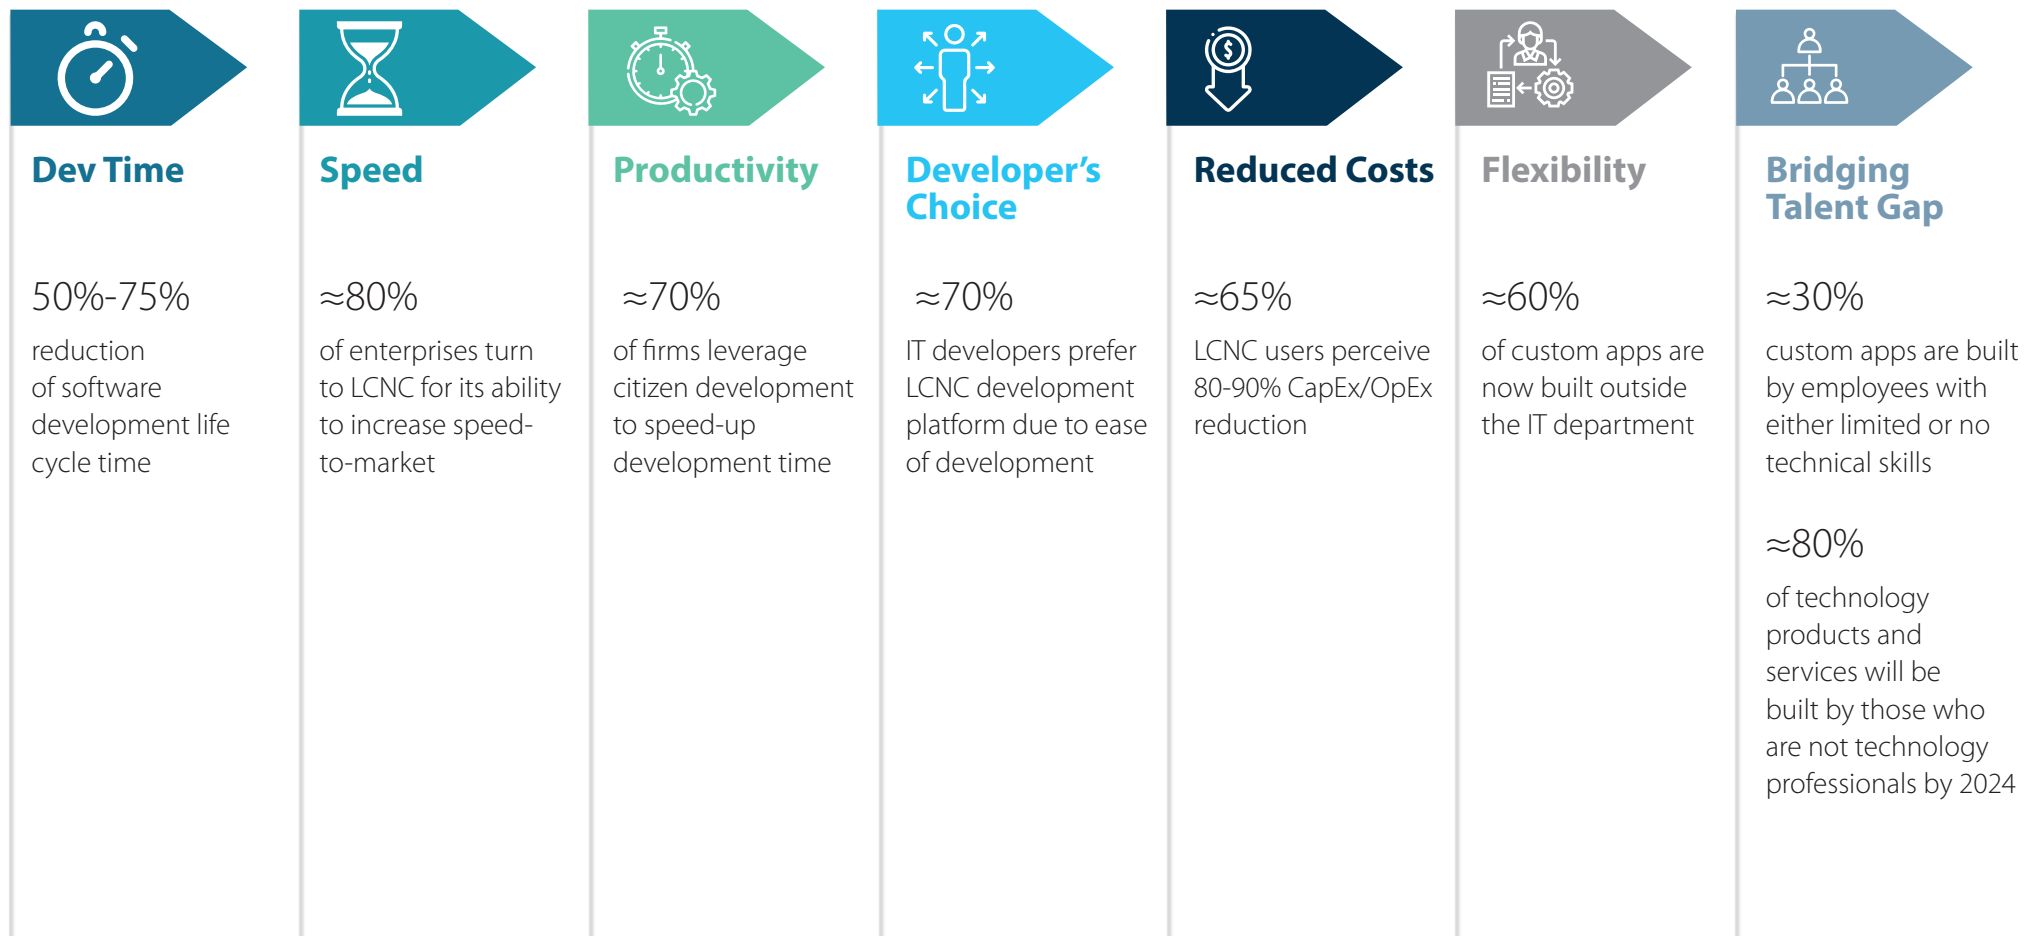

Integrated APIs – LCNC helps Tech Players reduce integration issues, cut down on the maintenance time and focus on core solution

## Multi-Partner Approach

Partner Driven Ecosystem for Scale – 90% of IT Services firms leverage a multi-Partner Approach

It also aids in close Involvement of Multidisciplinary Teams enables collaborative development

# Reduction in Development Time & Speed are biggest Benefits of LCNC for Industry Adopters

# LOW CODE NO CODE LANDSCAPE IN INDIA

# India's LCNC Market Revenues Crosses \$400 Mn largely driven by Exports

LCNC Revenues	LCNC Headcount	# of Companies
~\$400M	~8-10K	~150 (125 Start-ups)

## Key Highlights

- +\$400 Mn LCNC Market in FY21 is expected to grow at a CAGR of 25% to reach \$1 Bn in FY25
- 70% of revenues coming from global markets – 20+ Indian LCNC providers are already operating across countries
- Majority of the growth from sectors like BFSI, SaaS, Retail and in-partnership with IT Services firms

## Indian LCNC Market Size (\$ Mn)

## Investments

85% to 90% of Indian LCNC Start-ups are bootstrapped  
Debt Funding is preferred instead of VC funding

## LCNC Start-ups Driving adoption in Indian Market

90% Indian adopters use Indian LCNC start-ups

## Proof of Concepts to Scale

80% PoCs Scale to Full Implementations  
Indian LCNC players leverage PoCs in India to enter global markets and showcase ready to deploy solutions

Sources: UneathInsight and NASSCOM Analysis (Top Players Revenues)

Note: Revenues and Headcount have been estimated using bottom up research methodology of analysing revenues of 70+ LCNC companies and IT services firms. Estimation is based on public revenues, disclosures in current interviews and past interviews/surveys run by UneathInsight and NASSCOM

# Indian Market is Served by ~150 LCNC Providers both Pure-Play & IT Services

Illustrative

## Indian LCNC Providers – Core

## IT Services – In-house + Partners\*

Sources: UnearthInsight Analysis

\*Indian IT services firm also partner with global LCNC companies like Kissflow, Mendix, Appian, Salesforce, Pega, Microsoft's PowerApps, etc.

# BFSI, Retail, SaaS are leading adopters of LCNC solutions

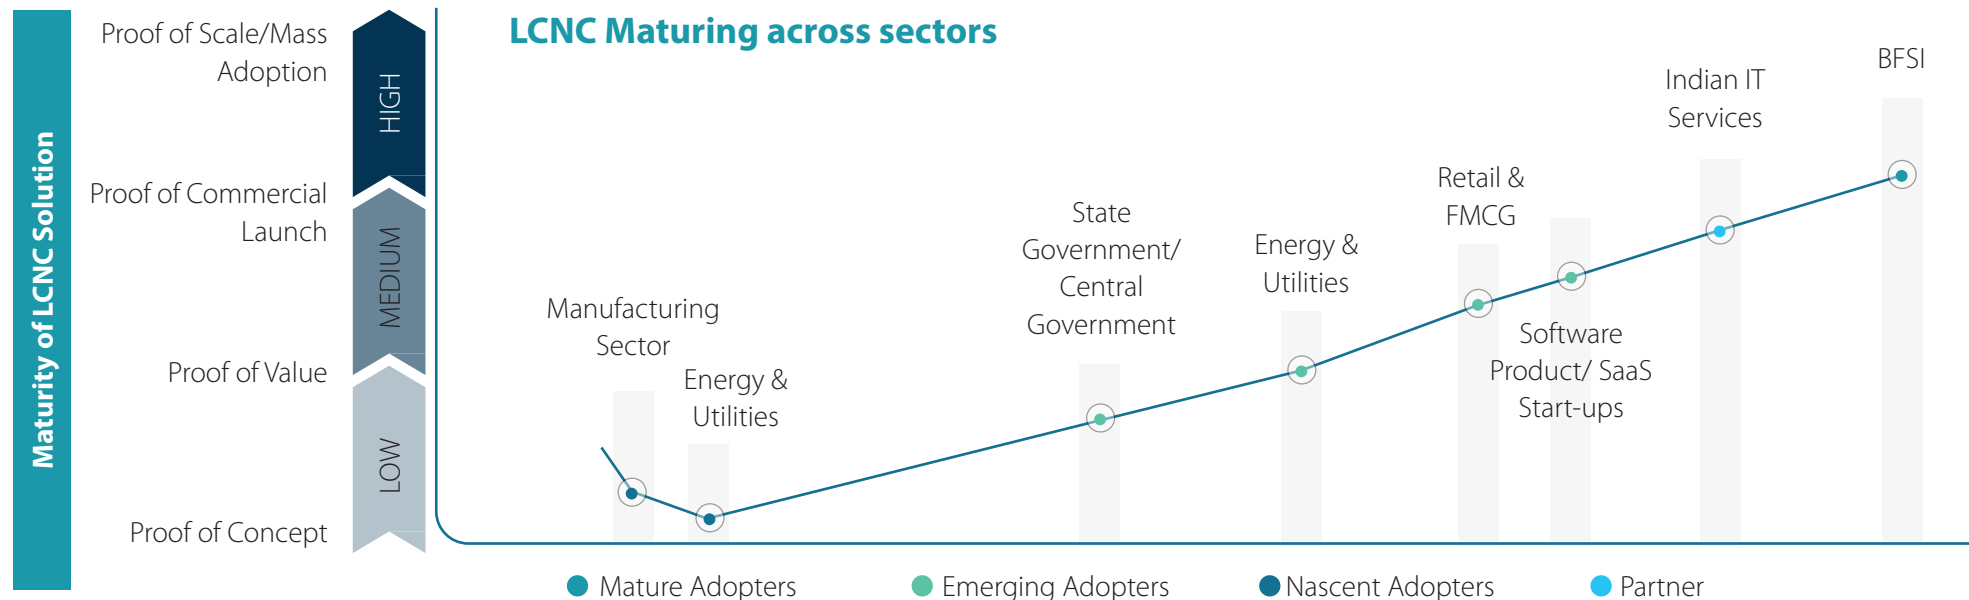

## Key Highlights

**In India LCNC adoption is growing fast and largely across large enterprises, with SMBs being slow in following the trail**

- BFSI – 60%-70% Revenues for Indian LCNC players driven by BFSI sector adopters like HDFC, SBI, Kotak, ICICI etc.
- SaaS Product Firms – 10%-15% Revenues for Indian LCNC players come from SaaS Product & Services Firms who are expanding into global enterprise markets.

IT Services Driving Global Expansion – 90% Indian LCNC players view IT services firms as channel partners for global reach and collaborate to leverage the growing digital transformation opportunity.

# Indian LCNC Adopters – BFSI, Indian IT, SaaS are Leading Adopters

Illustrative

## BFSI LCNC Adopters

## Govt LCNC Adopters

## FMCG & Pharma LCNC Adopters

## BFSI LCNC Adopters

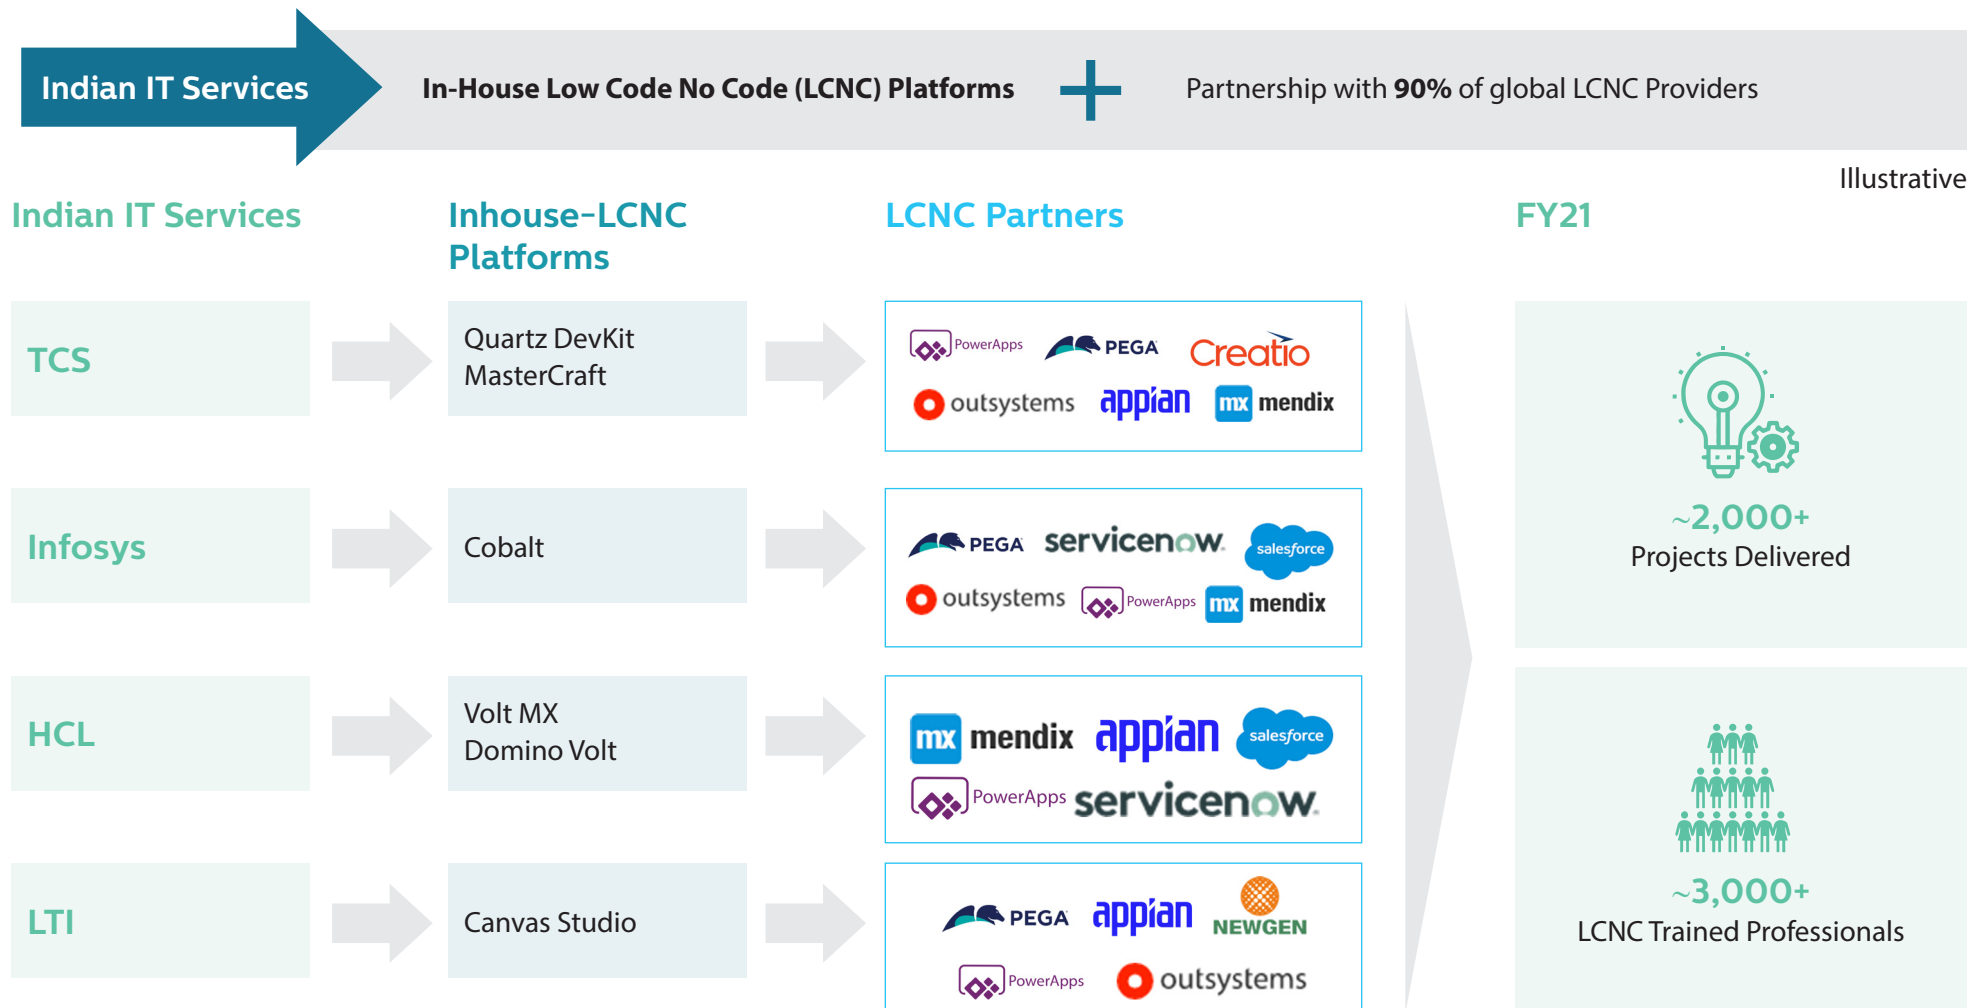

## Illustrative LCNC adoption examples – Indian Providers

	 Banking	 Insurance	 Logistics	 Manufacturing	 Sales Team Engagement	 Exports
The Solution	<p>A <b>video banking solution</b> to allow customers to access a complete complement of financial services online, featuring face-to-face interaction with a banker via video chat.</p> <p>A <b>lead management system</b> to allow customers to refer and earn.</p>	<p>An <b>Intelligent virtual assistant</b> that can access all relevant information from all systems and guide the agents during the call.</p> <p><b>Business team wrote down detailed flows and rules that the virtual assistant can use.</b></p>	<p><b>Finance and CRM Module</b> – General ledger, Account Receivable, Accounts Payable, Bank Reconciliation modules, were implemented in all branches next.</p> <p><b>Employee Portal</b> – for the employees to view / edit their personnel information and to view notice board information.</p>	<p><b>Data migration</b>- integration with their internal systems was achieved much faster with No Code approach</p> <p><b>Single application</b> Client had clear view of their entire operations in a single application</p>	<p><b>‘Gamification as a Service’</b></p> <p>Built three apps in four weeks: A Photo Contest app, a Sales Contest app and a Quiz app for increased sales team engagement.</p>	<p><b>Automated</b> high-impact paper and excel-based processes involved at various stages of seafood processing.</p>
The Impact	<p>The team was able to <b>go live for solutions in 40% time</b> compared to a typical custom development <b>with Decimal Technologies’ Vahana</b></p>	<p>The app <b>was built 10X faster</b> and made rapid changes possible on real time basis with <b>Wizergos</b></p>	<p>Improved shipment tracking.</p> <p><b>Manifestation time reduced from 20 min to 3 Min</b> with <b>Agile Lab’s AXPRT</b></p>	<p><b>Manual work</b> was removed with <b>massive increase in productivity with eNextCloud’s platform</b></p> <p><b>Clear view</b> of the <b>entire operations in single application.</b></p>	<p>The apps developed by <b>Drona HQ</b>, helped in driving engagement and productivity of the salesforce while increasing the market penetration</p>	<p><b>Improved productivity by over 15% with Quixy</b></p> <p><b>Reduced the application development time by over 60%.</b></p>

# Indian IT Partners with LCNC Providers to Accelerate Digital Transformation

# India Offers Advantage of – Large Talent Pool and a Testbed for Scalable Global Solutions

## Talent Pool

Platform Development Talent –Engineering and Product Development talent to enhance LCNC platform building capability. 90% of Global LCNC firms leverage India for platform development through their GCCs (Example – OutSystems, Pegasystems, Kissflow etc.)

Customer Success Talent –Product Management Talent across SaaS/ Product and Tech Start-Ups

## IT Ecosystem

Market Penetration – LCNC firms can partner with Indian IT Firms who can enable market penetration supporting deployment of solutions globally to over 50+ countries

Agile and Just-Time Development Talent – Access to 5+ Mn IT Talent for Implementation & Large-Scale Deployment

Capability Centres – Global LCNC players are leveraging India as “Capability Center” to build innovative “Ready to Deploy” solutions for global clients

## Huge Indian Market

India as a Testbed for Scalable Solutions – Opportunity to sell scalable solutions built and tested in India across Banking, Financial Services, Insurance, Pharma and IT services.

Mass Appeal – Indian LCNC platforms have the capability to cater to large SMB market in USA/Europe which is evident from penetration of companies such as - Newgen, Zoho Creator, DronaHQ, Decimal Technologies etc.

## Competitive Pricing

Cost Advantage – 15+ Global LCNC players have a GCC or development centre in India to take advantage of cost arbitrage which helps them in developing competitive global solutions.

Indian Platform for the Global market – In addition to developed markets, Indian LCNC players are able to effectively sell in regions like Africa, Bangladesh, Sri Lanka and South East Asian markets due to their cost competitiveness compared to global players

# Industry Interviews/ Survey: 60+ Low Code No Code Providers/Adopters

NASSCOM partnered with UnearthInsight to develop the primary research strategy, rollout, and analysis of inputs that covered the key adopters from BFSI, Retail, Manufacturing, Hi-Tech/IT sectors + Indian LCNC solution providers and startups.

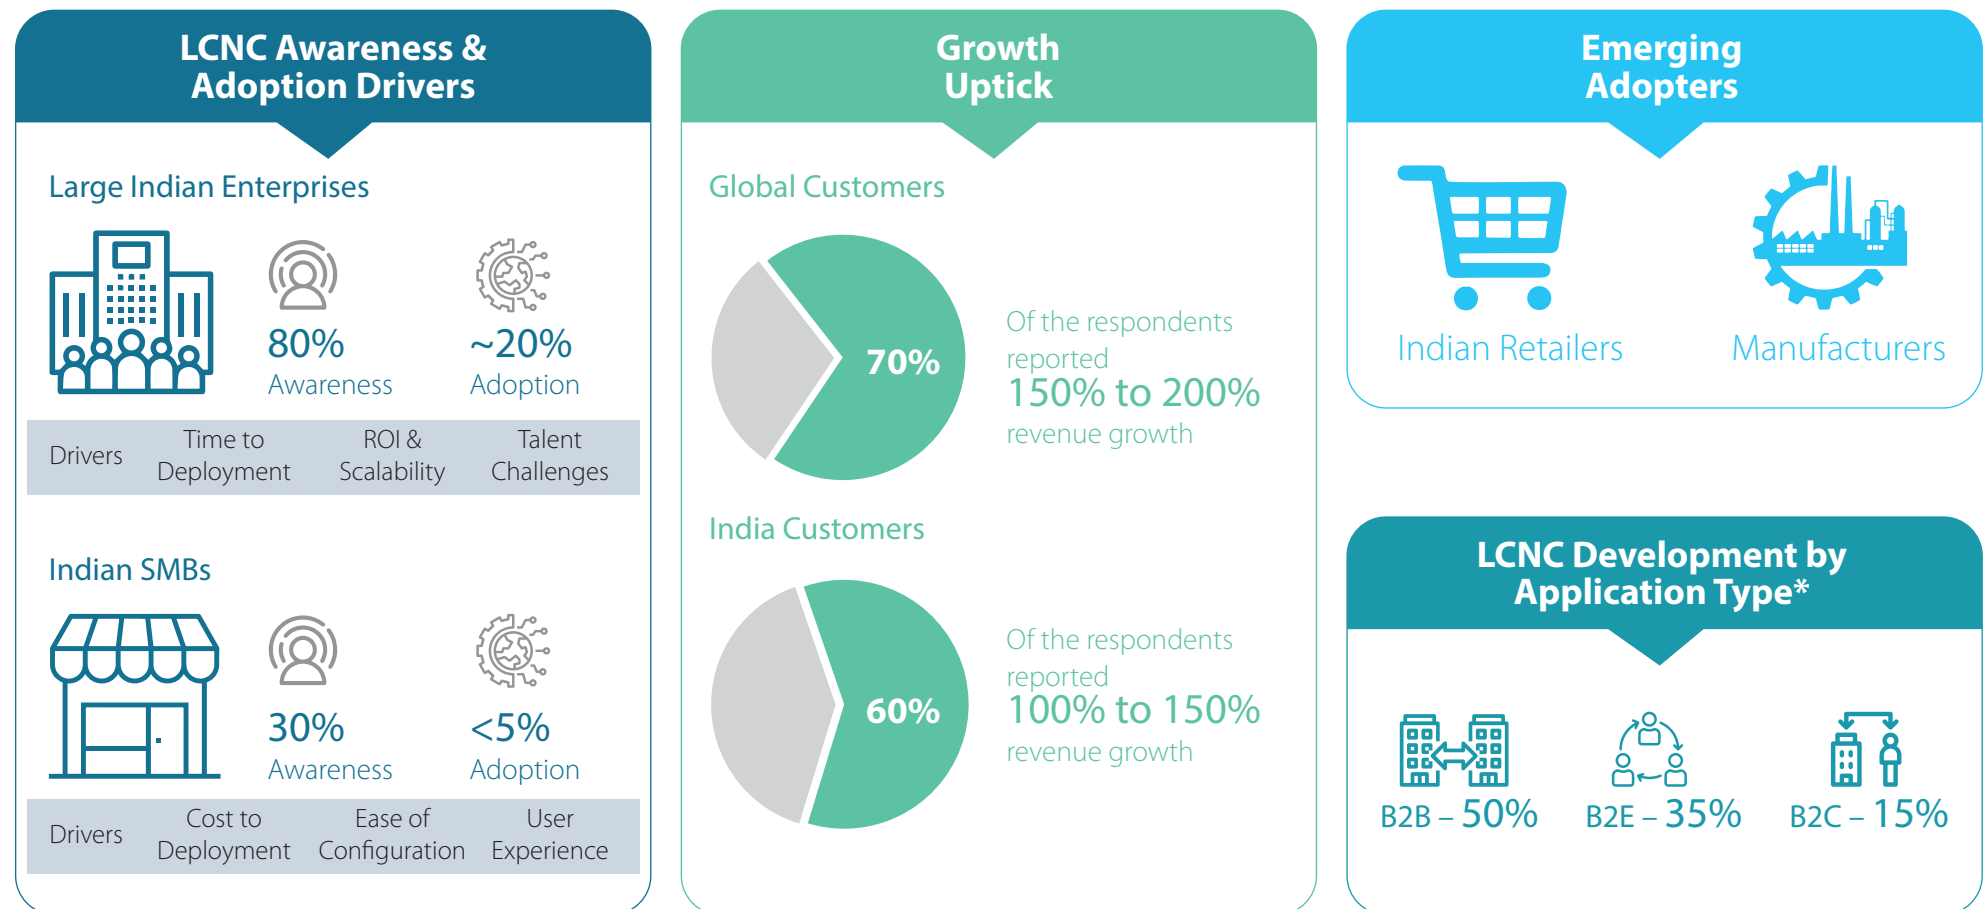

## Indian LCNC

## Surveys

# Pandemic Expedited the Digital Revolution Creating Growth Opportunities for Indian LCNC providers

## LCNC Provider Interview Insights – FY21

Sources: LCNC Provider Interviews/ Expert Discussions

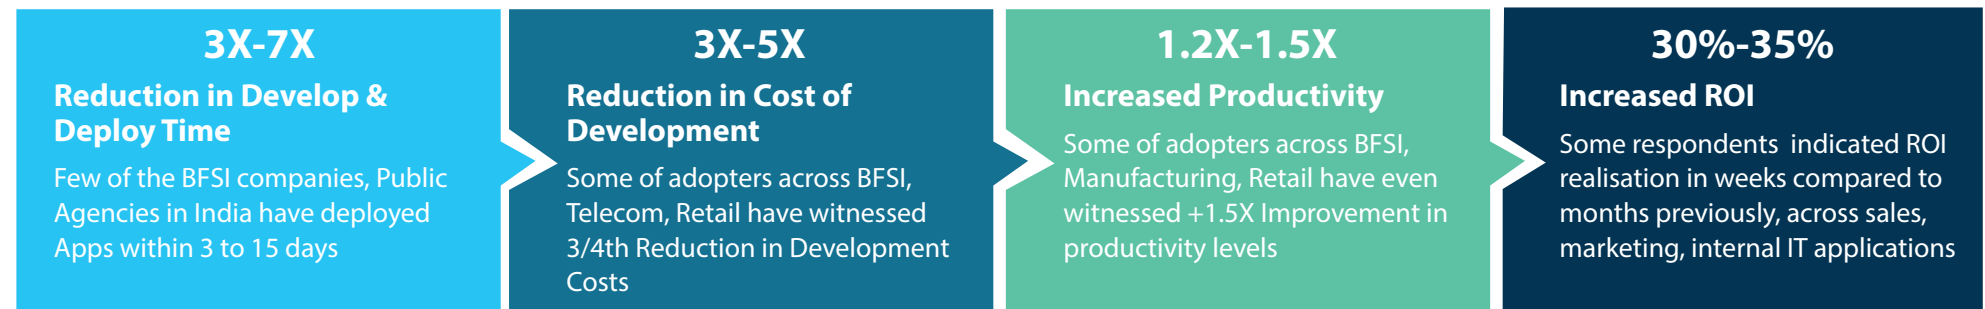

\*B2B – Business to Business; B2E– Business to employees, partners etc. internal stakeholders; B2C – Business to Consumers

# LCNC Cuts Down Development Time by 3X-7X with 3X-5X Lower Costs

## LCNC Adopter Interview Insights – FY21

## Benefits Realised

### Accelerated Development at lower costs observed for BFSI, Retail, SaaS and Manufacturing adopters

- Highest impact on development time and cost was experienced in process centric use cases in customer apps for credit card, banking, customer onboarding or within HR like virtual interview, candidate engagement, onboarding and relocation
- Sales/Marketing use case for lead tracking, spend analytics platforms witnessed 3-4X reduction in costs along with 9-10X faster development.

# Reluctance to Move from Legacy Remains a Key Inhibitor for LCNC Adoption

## Inhibitions

Most of the low-code/no-code platforms are developed keeping in mind larger enterprises which doesn't suit SMBs/Mid Size firms

Lack of training on usage on low-code or no-code solutions is a major inhibitor to adoption  
Which also fuels inhibitions around feasibility of implementation

Business and Technology Stakeholders are reluctant to migrate from legacy to new tech/LCNC

## Provider Intervention

Partner with IT Services vendors to assist in developing platforms with unique customizations that can match the requirements and help these firms achieve their business goals.

Leverage Training Partner Ecosystem to build ready to deploy talent pool for clients and internal teams

Communicate Business Benefits of LCNC to help over come Stakeholder inhibitions

Support them in integrating the platform in the existing IT set-up

# Product's Acceptance & Data Security are major apprehensions across Indian Adopters

## LCNC Adopter Interview Insights – FY21

### LCNC Adoption Apprehensions

90% of respondent faced apprehensions in early stages

#### Apprehension 1

Product Acceptance

#### Apprehension 2

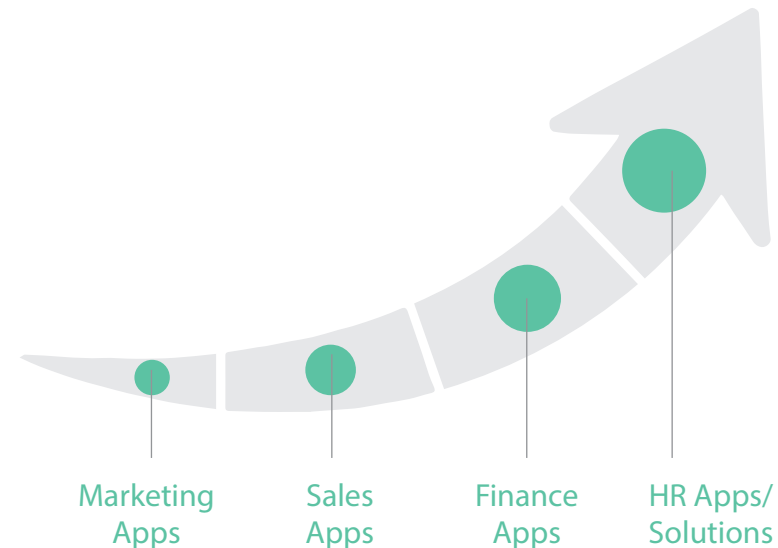

Data Security

#### Apprehension 3

Execution Capability of these solutions

### Departments Adopting LCNCs

Process oriented functions are witnessing increased adoption of LCNC solutions

A silhouette of a person standing on a dark, jagged rock peak. The person's arms are raised in a 'V' shape, and they are facing away from the viewer towards a vast, hazy landscape of blue mountains under a clear sky. On the left side of the image, there is a large, semi-transparent teal circle containing the text 'SUCCESS FACTORS'.

# **SUCCESS FACTORS**

# Key Success Factors for LCNC Providers

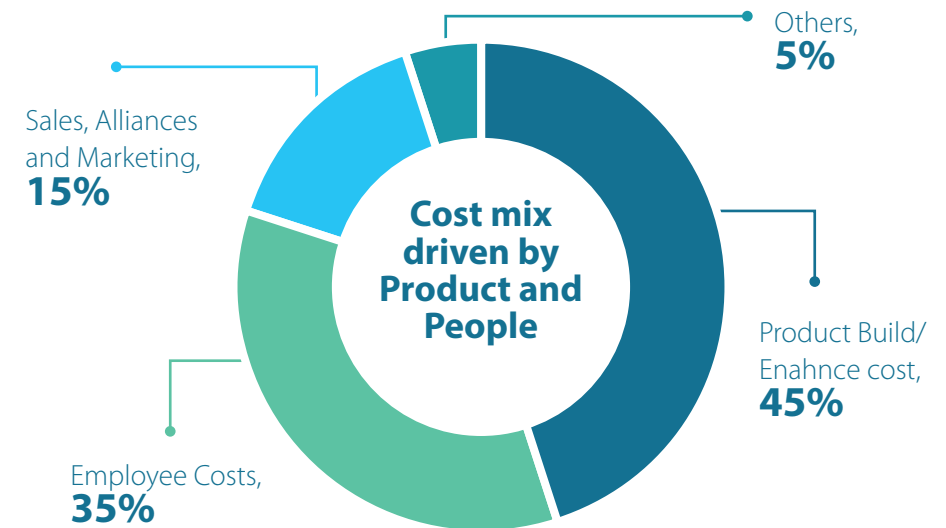

## Right Skills

Emerging LCNC Roles		Skills Required	
Product Owner		Analytics Skills (Python/R)	
Pro-Coder		Advanced JavaScript, Advanced HTML, C# & CSS	
Subject Matter Expert		SOAP, REST, Web Services & Backend Integration	
Tester		OPA 5 Framework, User Story, Manual Testing	
Application Designer		API, JSON, Cloud, vFlow	

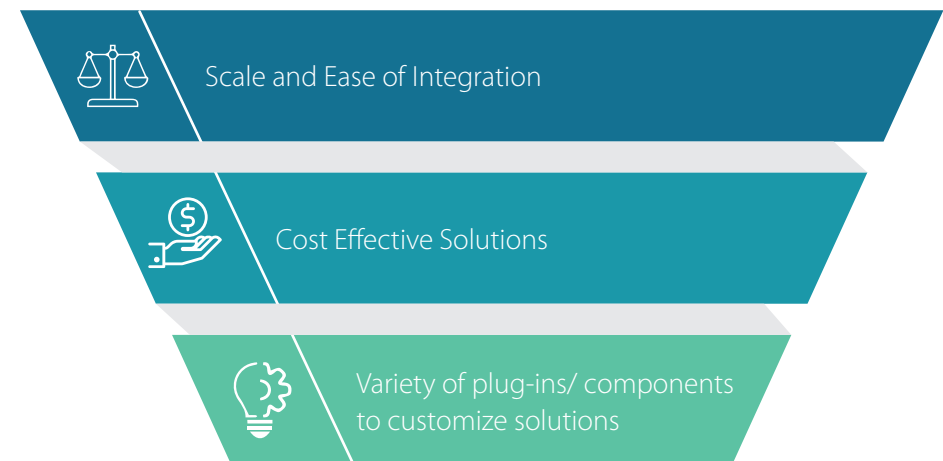

## A Balanced Go-To-Market Strategy

SI & Consulting Partners	Direct Sales
50% sales through IT services partners who position existing use cases/solutions	50% sales through direct pilot of existing LCNC use cases

## The Asset Light Business Model

## Top 3 Differentiators Adopters Seek-in an LCNC Solution

A hand holding a magnifying glass over a dark blue background with bokeh lights and a green circle.

# RECOMMENDATIONS & OUTLOOK

# India has the Potential to Become a \$4 Bn LCNC Market with a Higher Global Market Share by 2025

## Outlook

**Growth Areas:** Majority LCNC providers indicated a very positive outlook as they foresee more demand for solutions in Data collection/Process dominant/UI/UX driven segments.

**Optimistic Scenario:** Indian LCNC providers have the potential to further increase their global market share if all the stakeholders come together and work towards the recommendations.

- Digital first enterprises will continue to drive adoption and growth of low code no code
  - LCNC adoption across large enterprises will continue to be led by the IT services as Consulting, SI and Implementation partners for large LCNC providers
  - Adoption across SMBs will continue to be dominated by direct partnership with smaller LCNC providers which offer them better pricing and more customizable solutions

## Outlook for India's LCNC Market

## Pricing Model

- Fixed Price
- Platform Usage Pricing
- Per User Pricing

- Annual Usage Fees
- Project/ Solution Based

- SaaS/ Subscription
- Outcome Based – Global Alliances & Partnerships

# Recommendations – Building Awareness on LCNC and its Benefits is Critical for Pushing its Adoption across Sectors

## LCNC Providers

### Custom Pricing Models

- Develop unique pricing models to engage mid size/ small firms who typically operate with lower overall tech budgets.

### Partner with Mid Size and SMB IT Services Firms

- Popularize Indian LCNC solutions through Partnership with Mid to Small Size IT services firms.

### Build Talent Pool & Focus on Skilling

- Build LCNC Talent Pool for skills like OPA5 Framework, SOAP, REST, JavaScript, HTML5, UI/UX, Analytics through Training Partners, IT Services Partners and Education Institutes/Universities

## LCNC Adopters

### Strong Leadership Commitment

- Budget – Considering the Benefits that LCNC offers, both large and SMBs need to create a LCNC budget as part of their tech budget to try out the available solutions.
- SPOC – Corporates to have a dedicated LCNC SPOC who will focus on Research for LCNC Solutions → Identify Sector Specific LCNC Solutions → Pilot → Full Scale deployment.

## Associations

### Building Awareness around Low Code No Code

- Increase Awareness of Low Code No Code Solution in partnership with providers through:
  - Roundtables
  - Conferences
  - Webinars
  - Case Studies Compendiums and other related reports

### Support Providers on Reskilling

- Provide support in reskilling the incoming tech talent in the country by driving courses relevant for LCNC development skills:
  - On portals such as future skills
  - In partnership with educational institutes/ universities

Adopting a LCNC platform for your business gives you a competitive edge by making processes more efficient by optimizing the use of resources. The end result you get is an increase in revenues and reduction in costs at the same time. As more and more companies go digital, the relevance of such LCNC platforms will only increase in the coming years.

**Sachin Vijan,**  
Director Technology, Naggaro

# APPENDIX

# **CASE EXAMPLES**

# Data Synchronization with limited bandwidth made possible with Agile Lab's AXPERT for Uniworld Logistics

## Problem Statement

Uniworld Logistics, is as one of the most versatile Logistics service provider in the industry. The company has many co loaders across the globe. Thus, they required a system to exchange data with their co loaders. The long job cycle in their current system was a real pain for the data entry operators. Also, the manual way of calculating job profits resulted in error prone MIS reports.

## Solution

Agile Lab implemented Logistics Operation Package to cover freight forwarding operations of UWL covering Air / Sea imports and exports, in all branches of UWL, in 6 Calendar months (including rollout in all branches)

**Finance and CRM Module** – General ledger, Account Receivable, Accounts Payable, Bank Reconciliation modules, were implemented in all branches next.

**Payroll module** was implemented in 10 days time. **Employee Portal** – for the employees to view / edit their personnel information and to view notice board information.

**Overseas Rollout** – Rollout of Operations Package in Shanghai, Hong Kong and Singapore.

## Impact and Benefits

- Improved shipment tracking.
- Smart Client- a single point master creation that helps synchronization between various branches.
- A highly efficient Job Costing algorithm provides accurate costing information.
- Better control over invoice creation and job cycle
- Instant Profitability analysis instead of end of the month calculations
- Single screen view of entire process- Easy navigation through the inbox concept
- No redundant data entry. Automated finance voucher creation.
- The number of head counts in Accounts department reduced by 40 %.
- Automatic creation of jobs and on time manifestation.
- Manifestation time reduced from 20 min to 3 Min
- Enhanced irregularity monitoring and proactive system alerts
- Better Credit Control.

## Scale of Deployment

- Installed in 18 branches across the globe
- Each branch at an average generates 5000+ invoices (Job Orders) and records 7000 supplier bills per month.
- 25,000 to 30,000 invoices raised per Month
- The incremental data from all the branches are synchronized to HO and vice versa, in an interval of 15 mins
- 4,00,000 transactions per year/ country.

# Decimal Technologies' Vahana for an Indian Bank

## PROBLEM STATEMENT

To transform the banking scene in Indian market with next-gen digital banking platform featuring face-to-face interaction

To make **banking simple** for its customers and excel in customer service

To create digitized onboarding journeys and create **video banking solution** to ease customer interaction with the bank in today's all remote environment

To **enable online access** for basic needs like Current Account, Savings Account, Fixed or Recurring Deposits and a referral program

In the **lending space** the bank wanted to enable the credit card business and their customer onboarding

## SOLUTION

Digital solution eased customer onboarding journey, service requests, provided concierge service to end customers and allowed for video KYC. Vahana's impressive integration capabilities allowed the platform to seamlessly integrate with bank's core banking solutions and external video partner.

A **video banking solution** to allow customers to access a complete complement of financial services online, featuring face-to-face interaction with a banker via video chat.

A **lead management system** to allow customers to refer and earn.

**Liability side assisted** journeys such as CASA, TD, RD as well as self-journeys like savings account and fixed deposits.

## IMPACT

Vahana developed a cutting-edge digital banking platform to extend the bank's services digitally and allow customers to seamlessly interact with the bank for all purposes.

Vahana's rapid application development capabilities, time to go-live and the speed with which the team could make changes in today's agile environment is incomparable. The team was able to go live for solutions in 40% time compared to a typical custom development.

This created a leadership opportunity for the bank for being first mover in small banking space with great innovations and customer experience.

# Drona HQ for Mondelez

## Problem Statement

Mondelez experienced resistance in the minds of their sales representatives to accept digital methods to achieve their goals. Mondelez needed a solution to increase employee engagement and promote product knowledge development. They needed a robust solution they could easily iterate upon to keep meeting business needs across various markets.

Low adoption

High Resistance towards technology platforms

Low Engagement

Employees have low product knowledge development

Repeated Iterations across multiple geographies

## Solution

Mondelez used the Drone platform to launch 'Gamification as a Service'. They built three apps in four weeks: A Photo Contest app, a Sales Contest app and a Quiz app. The Photo Contest App is like the Instagram of Mondelez. Similarly, the Sales Contest App and Quiz App are being used to drive more sales and test product knowledge of the Sales Reps.

## Impact and Benefits

The Apps are helping Mondelez in driving engagement and productivity of its salesforce while increasing the market penetration for its newly launched product or product innovations across different markets. They are also allowing the company to gain consumer insights and drive essential KPIs. Gamification proved to be a mechanism that reduced stress while driving engagement.

## Scale of Deployment

The platform enabled them to use these services across China, Philippines and countries in Latin America without making any major changes. They plan on further developing the apps to evaluate a host of business requirements around L&D and New Product Launches.

# eNextCloud's platform for a large manufacturing client helped extend their existing solutions through integrated applications

## PROBLEM STATEMENT

One of the world's largest manufacturers was out looking for a solution to extend their SAP and allow integration; The existing off-the-shelf applications required min of 30-40% of customization, which became too expensive and time consuming.

### Challenges faced:

Multiple platforms being used in house and integration was a big task for them.

Data migration from legacy systems.  
Deployment of large legacy solutions took too much time to deploy and train their employees.

Communication between multiple stakeholders was all over the place and their smallest of operations were taking a lot of time to complete

## SOLUTION

**No Code solution deployed to build a complete solution for the client within a span of 2 weeks, which was at par with off the shelf solutions- along with many more benefits of faster development and customization.**

**Customized application** built for the client within 2 weeks

**Data migration-** integration with their internal systems was achieved much faster with No Code approach

**Single application** Client had clear view of their entire operations in a single application

## IMPACT

Data migration and storage integration with their internal systems was achieved much faster with eNextCloud No Code approach.

**Manual work** was removed and they could see massive increase in productivity.

**Clear view** of their entire operations in single application.

**Return on investments** customer understood the agility and benefits of No code solution and could see the ROI within weeks rather than waiting for months just for deploy a readymade solution which will again have to customize for many more months and was very expensive.

# Quixy helps Nekkanti Seafoods increase their productivity by 15%

## PROBLEM STATEMENT

**Brief:** Nekkanti Sea Foods Limited (NSFL) is one of India's largest exporters of seafood. It has its processing facility in Visakhapatnam. They have been exporting substantial quantities of Fresh Water Shrimps in various product forms, raw, cooked, and blanched to various international markets.

**Challenges Faced:** Paper-Based Data Processing was tedious, and time taking and led to issues such as- errors and discrepancies caused by manual data recording of materials being processed and of the workforce involved resulting in Information Silos Proliferation and Inaccurate Performance Measurement.

## SOLUTION

NSFL used the Quixy platform for decentralizing application development to empower process owners to build solutions for their challenges without depending on the central IT Team. They set up a core platform across various departments while the central IT team put together the necessary governance and monitoring structure to ensure that processes automated across different departments seamlessly integrated without any information silos and data redundancy.

## IMPACT

Quixy helped Nekkanti's staff automate high-impact paper and excel-based processes involved at various stages of seafood processing.

Single Source of Truth-The automated system helped eliminate errors and reconciliation issues from the manual recording of data, improve productivity & efficiency, and brought transparency into operations.

Nekkanti improved its productivity by over 15% and reduced the application development time by over 60%.

# Wizergos provided Virtual Assistance for Contact Center Agents at a leading Insurance firm in India

## PROBLEM STATEMENT

### **Challenges Faced:**

Contact Centre facing large volume quality issues

Specifically: Low First call resolution (FCR) and high error rates

Agents need to look up many different databases: user, policy, claims

Agents need to know many complex rules and regulations across products

## SOLUTION

An Intelligent virtual assistant that can access all relevant information from all systems and guide the agents during the call.

Business team wrote down detailed flows and rules that the virtual assistant can use.

## IMPACT

Agility and Flexibility- In the third month of Wizergos development the app could handle upto 30 flows in two months- up from 1 flow in 6months via the traditional development method

Time to Market & flexibility - The app was built 10X faster and made rapid changes possible on real time basis

The solution provided was scalable, secure, with the capacity to handle 10 M messages per month, being used by 1000 employees and had a robust scale out architecture

# Research Methodology

## Research Approach

### Identification of Low Code No Code (LCNC) Adopters and Providers

Created List of 100+ LCNC Adopters and Providers

### Research Interviews & Surveys with 60+ LCNC Adopters and Providers Globally and in India

45+ Interviews of Providers and Adopters

- Providers (35) – CEO/ Product Head Interviews to assess adoption trends, clients, trends/insights
- Adopters (10 - Sector Specific Corporates) – Interview CIO/Tech Teams adopting LCNC solutions across Core Operations, Finance, HR, Supply/ Logistics etc.
- 15+ Surveys of Adopters

### Desk Research/ Secondary

Company Wise –News Articles and Interview of CXOs

Detailed Secondary Research on Global and India Specific Trends and Insights

### Estimations, Expert Interview & Final Analysis

Discussion with 20+ Industry Experts, CEO/Founders & Sales teams of Product companies for deeper insights & trends

Revenue Extrapolation, Horizontal/Vertical and GEO Analysis

# Acknowledgements – LCNC Providers and Adopters

This report has been developed through a comprehensive study to understand the current state of Low Code No Code adoption in India. The preparation of this report has been facilitated by 10 adopter and 50 provider companies through direct inputs, and several organizations who have extended expert guidance. We wish to sincerely thank the following organizations, and all others, for contributing via direct participation and inputs through sharing of content, advice, and recommendations, as well as, through informal discussions.

Sameer Goyal	Director, Head of Engineering	Acuity Knowledge	Shubham Rajelli	Co-founder, CTO	Officexlr
