nagarro

Re-engineer your digital DNA with Nagarro and low code

Across industries, technology is redefining the way business organizations function. As more and more organizations embrace this change and implement a digital shift, speedy and streamlined app development has become even more crucial.

As your digital partner in this journey, Nagarro aids your digital transition with our low code capabilities. We take a consulting approach to all low-code implementations and leverage our platform and integration expertise to deliver tangible business results.

As your low code partner, Nagarro helps accelerate your digital transformation journey through

- A tailored approach for successful low code implementation and utilization

- Data-driven insights and value-driven approach for Maximizing ROI

- Focused, flexible, and efficient low-code development

Our approach: We help you throughout the entire low code development cycle from start to finish

Consulting

Creating a digital strategy and process blueprint, defining a roadmap, identifying and prioritizing use cases, and developing prototypes.

Training

Comprehensive trainings featuring platform learning, mentorship, real-world use cases, dedicated support and online resources and community learning.
Development

Enterprise app development with scalable team, agile collaboration, and global delivery with a value driven approach.

Maintenance and Support

Comprehensive application and platform support with customization, global models, process rationalization, incident management, and continuous improvement.

Some of the platforms we work with

mx mendix | Creatio | Power Platform | servicenow | ORACLE APPLICATION EXPRESS | simplifier | outsystems

H2O.ai | PEGA | AppSheet | TEMENOS The Banking Software Company | salesforce lightning | appian | Zoho Creator

Accelerators

- **Writing assistant**
- **Centralized user management**
- **Delegation management**
- **Dynamic tables**
- **Web hooks**
- **Teams integration**
- **Automation testing framework**
- **Social networks based SSO**
- **Dynamic forms**
- **Map controls**
- **Bulk data uploaders**
- **Gantt chart**

Some of our success stories

Active aging portal for seniors, offering medical assessments, nutrition, and fitness plans, developed for Middle East government entities.

Automating replication and **centralizing** real-time text and media analysis to **maintain Egypt's high-speed rail system**.

An **enterprise operating system** to **digitalize** a very large construction company's workflows, including project lifecycle management and compliance.

Ensuring informed **investments forecasts** and **improved budget planning** by **digitalizing** capex planning and approval workflow for a hydraulics leader.

Digitalization and **streamlining** of procurement process for 1500+ vendors/suppliers in a full **Supplier Relationship Management** app.

A centralized **Service Point of Sale** app used across 1000+ stores with extensibility for Retail business **streamlining** operations for a retail giant.

Process digitalization to identify and overcome **material shortage** by visualizing stock and production planning.

Modernization of **Financial Information Management System** providing centralized management and overcoming high costs.

Order management application to track and manage all orders end to end received from end clients and business users.

Digitalizing **visual inspection process for improved** customer experience for one of the largest crane manufacturers.

Centralized solution for **streamlined** calculation of project KPIs; NPV, IRR, MIRR, LCOE, Payback etc. for a global energy conglomerate.

Central integrated platform to **automate** the **employee onboarding process** and provide a seamless user experience.
