

Thinking Breakthroughs

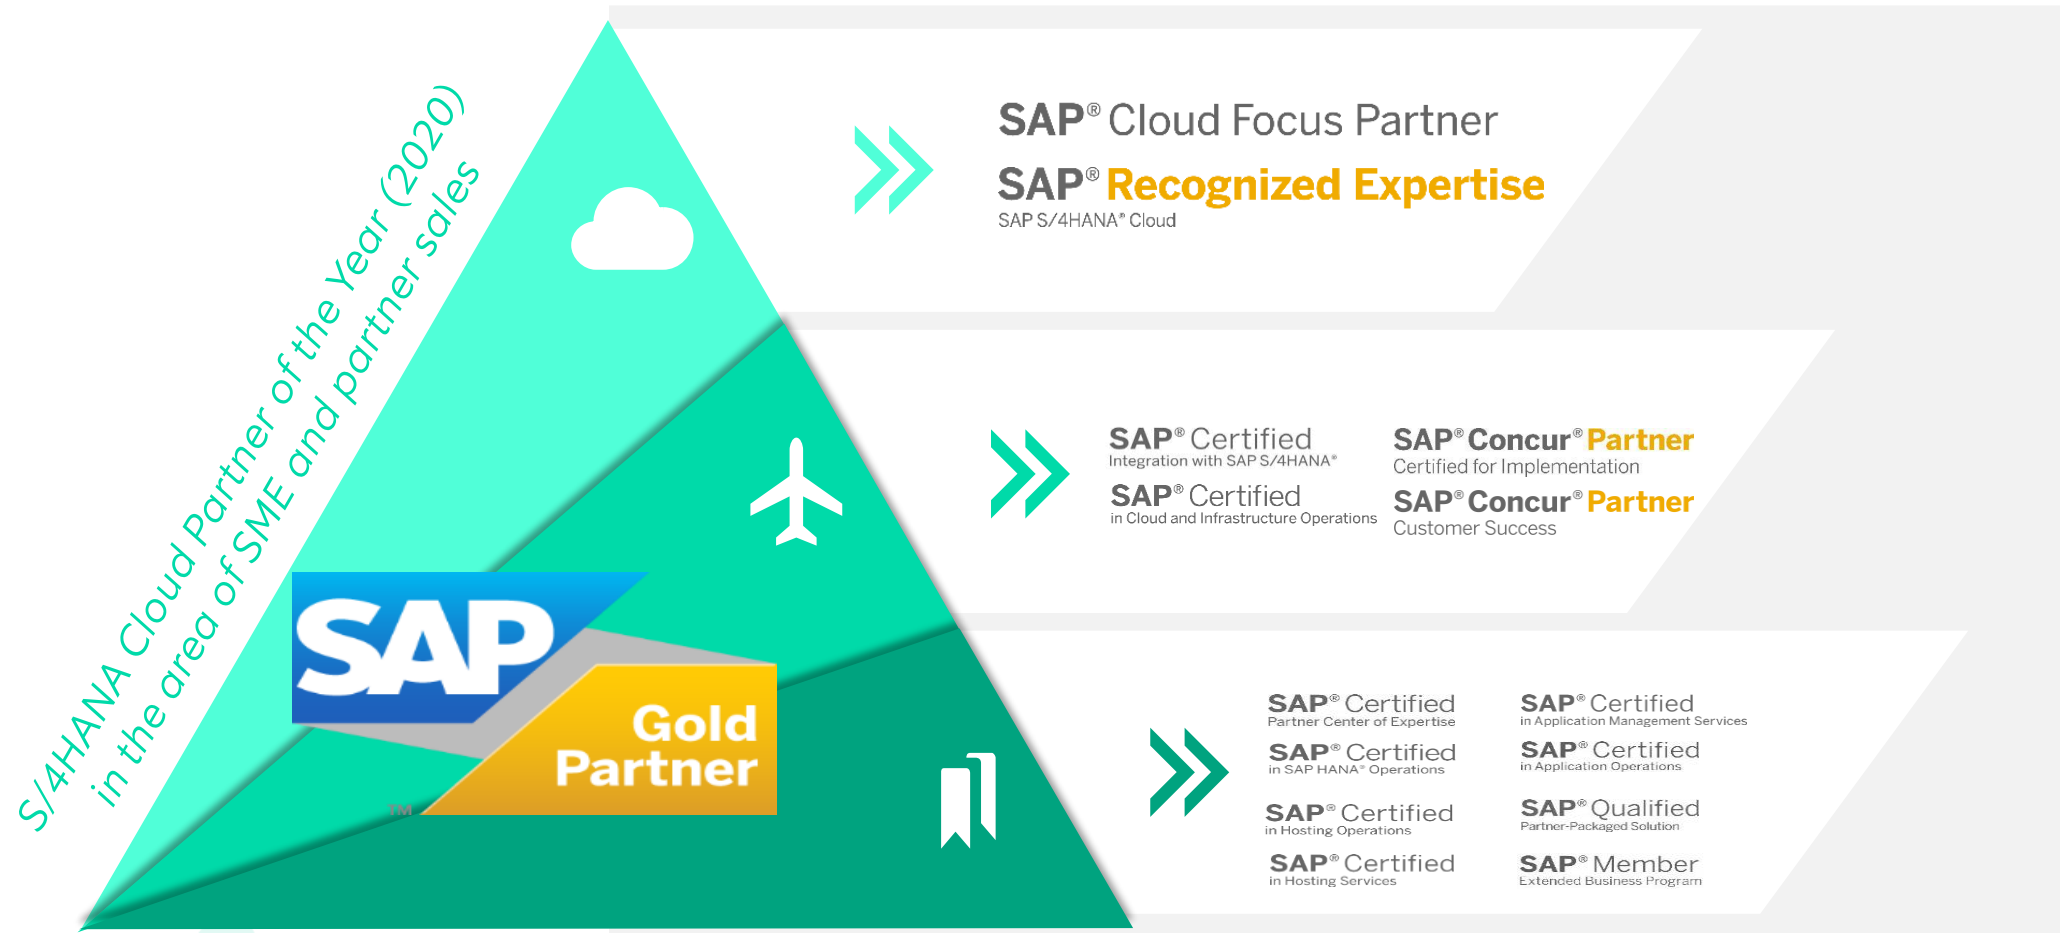

SAP Testing - Overview, Excellence & Positioning

Numbers that matter

At Nagarro, we practice digital quality assurance based on constantly evolving technologies, process and tools. Building on this, we conduct intensive R&D on the 'Accelerated Quality & Test – Engineering' and develop innovative approaches, framework, and other accelerators that guarantee our clients the best support.

SAP certifications and awards

Accelerated Quality and Test-engineering

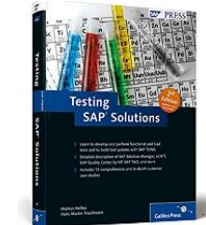

Global Scalability

- 20+ years experience in quality engineering with 96 current global QA projects
- 1000+ global QA experts. 547 in India, 130 in Romania, 82 in Vienna and more in other Geos such as US, Nordics and Dubai.
- 600+ automation experts, 47 performance test experts and 17 security testing experts
- Onsite, offshore & nearshore delivery center with top experts

Accelerators

- 15 certified and authorized ISTQB trainings
- A2A.DRIVEN - Advanced Test automation approach. [Click here](#)
- CQA.PROVEN – Continuous Quality Approach and toolbox
- 360-degree X-ray - Pragmatic QA quick health check approach (TPI based)
- Ai4T
- Performance framework - NINJA

**Our unique testing & test automation offer covers SAP,
non-SAP and integrated business processes**

SAP testing- Integrated Enterprise Approach

Our success stories

Big German food retailer

Harmonization and simplification of setting up the existing SAP system landscape based on optimized E2E business processes

German railway company

Analysis and optimization of the existing processes in the context of change requests and further development from the requirement to the acceptance test including regression tests and operation

Austrian Energy supplier

SAP CRM with customization of business processes. Test support through all testing phases (System test, SIT, Go live Tests)

Energy industry/ Hydropower

Testing of SAP migration where an old SAP solution for the control of hydroelectric power plants is to be replaced with a modern SAP implementation

International food retailer

Automation of complete business processes (SAP and mobile devices) for new electronic merchandise planning and control management system

Austrian health insurance

Definition and introduction of comprehensive methodology for all regional health insurance funds in Austria, new Austria-wide SAP accounting Programme in creation

How to start

Leverage our expertise to solve your challenges

The *SAP test management assessment* and *the SAP test automation assessment* reveals the health of the SAP QA organization or *automation* and recommends ways to set up an effective, state-of-the-art, pragmatic QA organization / test automation *tailored* to your specific needs.

For a fixed price, we deliver an assessment tailored for your needs based on our 50+ assessment experience: Starting from insights gained through upfront questionnaire, stakeholder meetings, workshops, presentaion & discussion of findings, recommendations and proposed roadmap and *a final report*.

Focus on tailored QA health checks

Austrian kitchen design organization

Nagarro conducted a QA analysis for a large agile project developed by client's IT subsidiary. After a tool evaluation we established test automation, defined a scaling test approach and coached client's testers and test managers.

German railways

We analysed current SAP implementation at German railways, the current state of test and QA and helped them develop an SAP test process fitting all their project needs. We defined a test tool set and established dedicated testing SAP test environments.

German non-profit org. in Nephrology

Test Management Assessment and analysis and optimization of the existing procedure in the SAP test environment. Optimize the use of SAP Solution Manager Test Suite with scope management, Test planning, Test sequences Daily discussions and preparation of a fact-based GoLive decision

Leading US consulting firm

Introducing a new test organization, the US consulting firm asked us to assess and document their current and future QA needs. In management workshops, we explained our findings and defined a roadmap for QA improvement.

Imagine what we can do together

We are excited for our next conversation
