

ATLAS cloud migration & modernization assessment workshops

Accelerate your cloud migration & modernization planning through our expert-led, AI-powered workshop. These workshops will help you decide **where to start, which workloads to migrate first, understand cost and risks, and build capability** while accelerating delivery. ATLAS, Nagarro's agentic AI solution will analyze your application landscape, dependencies, and complexity within hours while our cloud architects will guide key decisions and trade-offs.

Whether you're exploring cloud feasibility, building a roadmap, or executing a pilot, our modular workshops compress months of effort into focused, outcome-driven sessions.

What is ATLAS?

Nagarro's agentic AI-powered, end-to-end cloud transformation approach, ATLAS combines purpose-built AI agents with experienced cloud engineers to rediscover your cloud ecosystem, build actionable roadmaps, and execute real outcomes while maintaining strong guardrails for risk, stability, quality, and governance.

Results: Faster decisions, higher productivity, lower costs and risks

What makes these workshops different

Designed for speed

- Agentic AI-powered discovery with ATLAS — insights in hours, not months
- Accelerate time-to-cloud with AI-driven insights
- Up to 50% reduction in migration planning time

Built for confidence

- Data-driven recommendations, not assumptions
- Lower decision risk through real data and pilot validation

Focused on execution

- Execution-focused approach beyond strategy decks
- Expert-led delivery with real-world modernization experience

Ready for your environment

- Multi-cloud ready across AWS, Azure, GCP, and hybrid environments
- Hands-on knowledge transfer to build internal capability

Choose the workshop that suits you

 Half-Day Workshop (Quick Start)	 One-Day Workshop (Plan & Roadmap)	 Two-Day Workshop (Strategy & Execution)
Ideal for: Early-stage exploration & leadership alignment	Ideal for: Organizations ready to plan migration seriously	Ideal for: Enterprises ready to move into execution
What you get in 4 hours: <ul style="list-style-type: none">• Migration feasibility assessment• Top application candidates for migration• High-level cost estimates• Risks & complexity indicators• Actionable next steps	What you get in 1 day: <ul style="list-style-type: none">• Application portfolio assessment & dependency mapping• Prioritized migration waves• Cost & risk analysis• Quick wins (30–60–90-day impact)• Migration roadmap & milestones• Executive-ready readout	What you get in 2 days: <ul style="list-style-type: none">• Deep portfolio analysis with readiness scoring• Target cloud architecture & landing zone design• Security & compliance blueprint• Pilot migration (proof of concept)• Migration playbook & runbooks• TCO, ROI & cost optimization insights• 90-day execution plan• Team enablement & knowledge transfer
Outcome: A data-backed go/no-go decision with a clear starting point	Outcome: A complete migration roadmap aligned to business priorities	Outcome: A validated migration approach + working PoC + execution roadmap

About Nagarro:

Nagarro is a global digital engineering and consulting leader with a full-service offering. With AI at the heart of most of our business growth strategies and our Fluidic Intelligence approach, we remove friction between people, data, and decisions, driving at least 20% productivity gains for enterprises. Nagarro employs 18,000 experts across 39 countries, ready to help customers succeed. For more information, visit www.nagarro.com
