

DevOps Maturity Assessment

Let's jointly identify the current state of your DevOps journey and the potential for improvement!

5-day workshop

The DevOps Maturity Assessment is an analysis-focused workshop that helps organizations who have started their DevOps journey or are planning to. This assessment identifies your current state of maturity and challenges spanning development, deployment, and sustenance using analysis gained through questionnaire and interviews conducted with multiple stakeholders.

As a result you will get tangible recommendations on the optimal DevOps state for your organization. Post assessment, a POC can be built as minimal working framework to showcase the increase in the level of maturity in one of the most relevant key areas for you.

Key Challenges

Do you have a lot of time and money overhead due to legacy infrastructure?

Is your time-to-market too high?

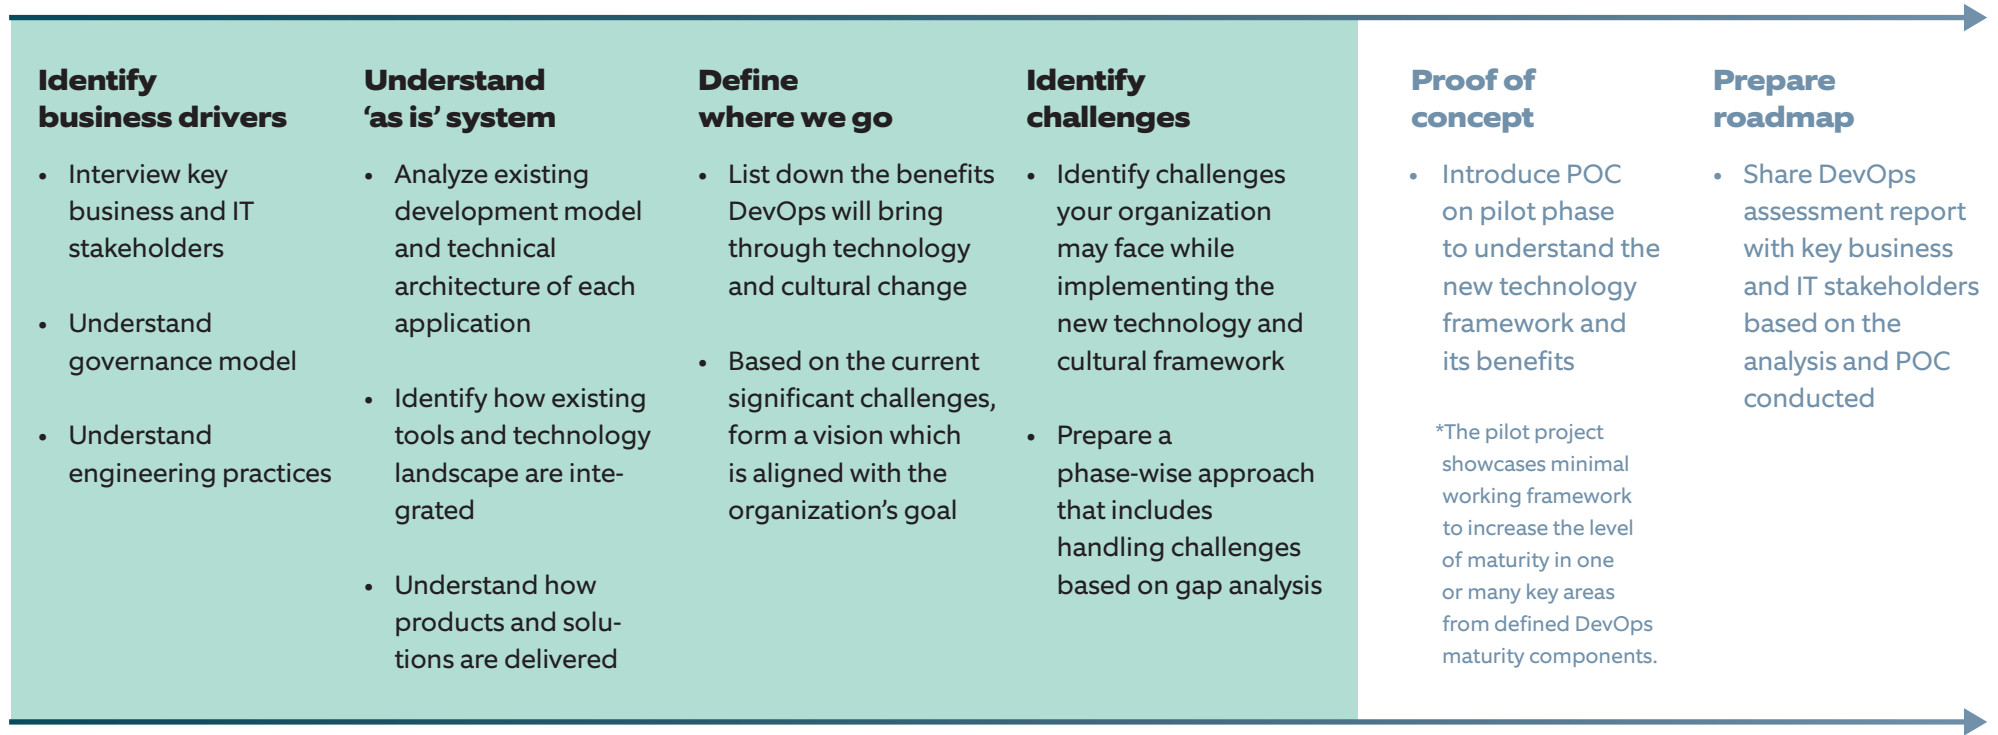

Do you want cross-functional teams for optimal collaboration and maximum throughput?

Workshop Concept

◀ **5-day Workshop: DevOps Maturity Assessment** ▶ ◀ **Next step: 5-day Pilot*** ▶

Workshop Outcome

- Understanding on current challenges grouped into themes
- Identifying the pilot project
- Current DevOps maturity level-based on best practices
- Quick wins
- Benefits to be received from transformation
- Recommendations on the optimal DevOps state and a high-level transformation roadmap

Note: In case supported POC is required then timeline may differ based on technology stack.

Why Nagarro

Tailored frameworks to speed up time-to-market
