Key Questions

?
Why does production still have many defects after spending a lot of money on testing?

How can I always see current proven progress and quality level?

How can I speed up testing and release cycles with QA stream while working integratedly with development?
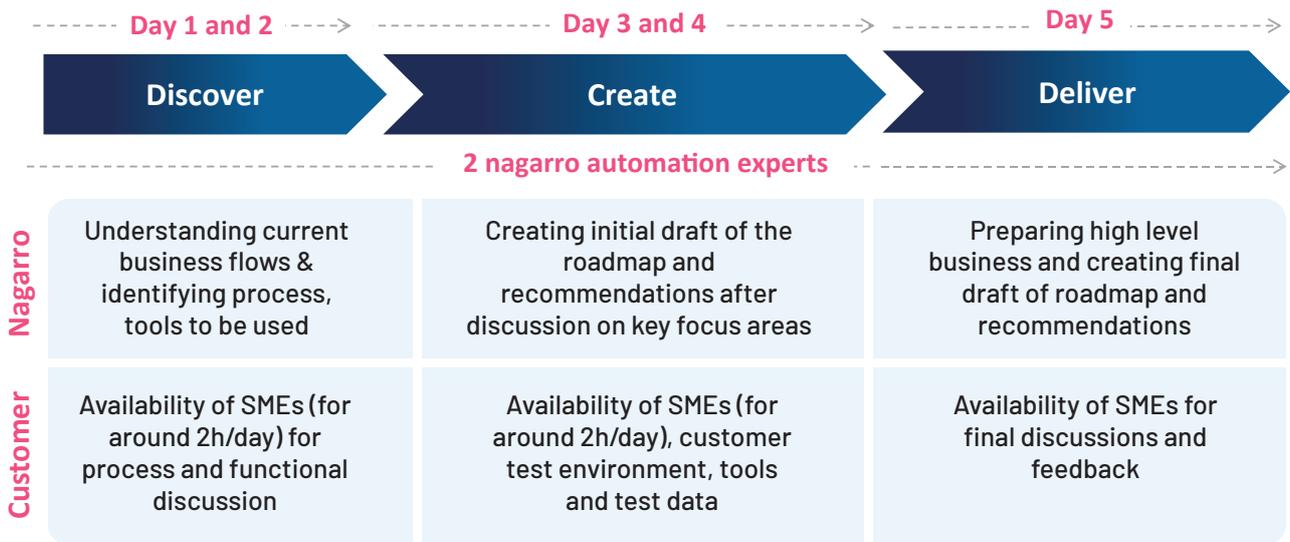

The 360-degree health check reveals the health of your QA organization, and recommends ways to set up a state-of-the-art QA organization tailored to your specific needs. The 5-day workshop starts with insights gained through a questionnaire, stakeholders' meeting and a final report that provides recommendations and roadmap for setting up a pragmatic test organisation.

PRE WORKSHOP
• Create workshop plan
• Preliminary discussion with stakeholders

POST WORKSHOP
• Implementations of roadmap and recommendations

WORKSHOP
